12kg Series 11 Contemporary Front Loader Washer, ModDose

Series 11 | Front Load

White

A premium Front Loader Washer delivering tailored care for every fabric and load. The glass control panel with vibrant 7” touchscreen and intelligent sensing ensures each cycle is gentle, precise and reliably effective.

- Optimal care for 15 fibre types, including Ramie and Hemp
- Vibrant 7" touchscreen for intuitive cycle selection
- Switch in and out specialist detergents with interchangeable ModDose cartridges
- Detect load size, soil level, and colour with multi-sensory intelligence

DIMENSIONS

Height	850 mm
Width	602 mm
Depth	661 mm

FEATURES & BENEFITS

OPTIMAL CARE FOR LUXURY FIBRES

Fisher & Paykel Series 11 Washers are the pinnacle of fabric care, turning every wash into a celebration of your finest fabrics. From the soft luxury of Cashmere scarves to the breathable comfort of Hemp trousers, or the flowing elegance of a Lyocell dress - each fibre is nurtured with precision, guided by the vivid 7" touchscreen. Even performance and outdoor fabrics are taken care of, with the ability to prepare garments for waterproofing. Intelligent technology accounts for the moisture absorption and fibre construction of each garment, adjusting temperature, speed, drum movement and detergent to deliver a perfectly balanced clean while extending the life of your garments.

ULTIMATE FABRIC CARE SOLUTIONS

Our most perfect pair yet, reimagined for modern living. A concealed handle, large glass door, machined control panel, and refined materials create a purity of form that balances luxury with lasting quality. A seamless glass fascia, push-to-open dispenser, and angled 7” touchscreen deliver intuitive control and integration with cabinetry, whether stacked or side by side. Designed to complement in both form and function, our Front Loader Washer, Display-Free Heat Pump Dryer, and Fabric Care Cabinet bring visual harmony to the home, with the Dryer seamlessly controlled via the Washer’s touchscreen.

BESPOKE AUTO DOSE

With its delicate protein fibres that are sensitive to high pH detergents, Silk needs extra care to maintain softness and sheen. The intelligent ModDose Dispenser includes six interchangeable cartridges for everyday, specialised, or manual use. Configure each one to be recognised by the machine, which guides the right formula for every fibre and ensures precise Auto Dose for gentle, tailored care.

INTELLIGENT COLOUR SENSING

Protect the vibrancy of Denim, Linen, and Silk with our advanced Colour Sensing. The system quickly distinguishes darks from whites, enabling tailored wash cycles with specific temperature profiles for each fibre. This reduces colour fading and preserves the brightness, depth, and richness of your garments for longer.

TAILORED STAIN CARE

Stains behave differently depending on the fibre they’re on — Butter should be washed in a solid state to prevent it from sinking into the pores of the fibre, while Tea, Coffee, and Red Wine cling more strongly to Cotton than Polyester. Our 5 Stain Treatments for 3 fibre types provide pre- or in-wash care tailored to both fibre and stain, lifting marks effectively while protecting the life and quality of your garments.

REFRESH WITH STEAM

Gently relax fibres to reduce wrinkles and odours with Steam Refresh. Perfect for a Hemp shirt or trousers, it smooths creases and restores the fabric’s natural shape. With a naturally rigid structure and high lignin content, Hemp fibres resist deep creasing and rebound effectively when steamed, leaving garments smooth, soft, and refreshed — without the need for a full wash.

FABRIC CARE ON YOUR TERMS

Crease Free+ gives you flexibility to unload laundry when it suits you. Ideal for Down, which can clump and compress when wet, Crease Free+ gently tumbles the load and circulates air while damp to separate and loosen fibres, preserving the natural loft and softness of garments and bedding. Drum Dry completes the care cycle by quietly circulating air to fully dry the drum. Simply close the door and the machine will be dry and ready for the next load when you are.

SPECIFICATIONS

Capacity

Capacity	12 kg

Connected Features

Alerts and notifications	•
Education and onboarding	•
Initial software update for full feature set	•
Monitoring	•

Where applicable:

All appliances use energy, and energy usage typically generates carbon emissions. **Fisher & Paykel Appliances' In-use Energy Carbon Emissions Estimate** indicates carbon emissions from a product's in-use energy. This is calculated either annually or per cycle, using the product's market-specific energy label energy consumption data multiplied by the carbon emissions factor for energy in your country or region.

Our In-use Energy Carbon Emissions Estimate is designed to assist customers in making informed purchasing decisions when comparing different Fisher & Paykel products. For example, a heat pump dryer typically has a lower In-use Energy Carbon Emissions Estimate than a vented dryer.
