- Easily get started with guided setup and tips in the SmartHQ™ app
- Elevated design offers a sleek, modern look that enhances your kitchen's aesthetic

DIMENSIONS

Height	61 mm
Width	600 mm
Depth	530 mm

FEATURES & BENEFITS

Link Mode compatability
Use Link Mode to automatically activate your compatible rangehood as you cook, creating an intuitive, hands-free experience in the kitchen.

Low current induction
This induction cooktop is an ideal low current option for replacing gas or ceramic models. With a 20A rated current and 4.5kW rated power, it supports cost-effective installation using existing wiring.* *Installation requirements may vary; consult a qualified electrician.

Guided setup with SmartHQ™
SmartHQ™ provides step-by-step onboarding, helpful tips and setup guidance — right from your phone. Designed to support you beyond installation, the app helps you get familiar with your cooktop and explore its features at your own pace.

Elevated design
A sleek black glass surface, refined detailing, and an updated user interface combine to deliver a cooktop that looks as good as it performs. Designed for seamless integration, it brings a modern, intuitive touch to everyday cooking.

Precise control
Fisher & Paykel induction cooktops respond instantly to changes in temperature, giving you precise control for everything from fast searing and sautéing to delicate tasks like melting or tempering.

Safer choice
Induction cooktops heat only when cookware is detected on the ceramic surface. Features like keylock, safety timeout, hot surface indicators, and auto switch-off in case of spills help ensure a safer cooking environment for everyone.

Where applicable:

All appliances use energy, and energy usage typically generates carbon emissions. **Fisher & Paykel Appliances' In-use Energy Carbon Emissions Estimate** indicates carbon emissions from a product's in-use energy. This is calculated either annually or per cycle, using the product's market-specific energy label energy consumption data multiplied by the carbon emissions factor for energy in your country or region.

Our In-use Energy Carbon Emissions Estimate is designed to assist customers in making informed purchasing decisions when comparing different Fisher & Paykel products. For example, a heat pump dryer typically has a lower In-use Energy Carbon Emissions Estimate than a vented dryer.
