

90cm Series 7 Classic 5 Burner Dual Fuel Freestanding Cooker

Classic

Get the best of both worlds with dual fuel. A gas hob with wok burner is paired with a nine-function convection oven.

- Five burner gas hob, with precise heat control
- Convection oven with 140L total capacity and nine oven functions including Pastry Bake with pizza mode and rapid proof for making bread
- Non-tip full-extension shelves for safe removal of hot dishes

DIMENSIONS

Height 898 - 946 mm

Width 897 mm
Depth 600 mm

FEATURES & BENEFITS

Multi-Shelf Cooking

Our AeroTech™ system circulates air evenly throughout the entire oven so dishes on the top shelf turn out just as perfectly as food cooking on the bottom shelf.

Quality And Durability

Every detail has been carefully crafted. The solid, perfectly balanced soft-close door, durable hob trivets and glowing halo dials all add up to an exceptional, premium range.

Burner Power & Control

Instant and immediate control from the highest to the gentlest heat. The finely tuned hob controls let you sear, stir fry or simmer a delicate sauce to perfection.

Large Capacity Oven

The generous 140L total capacity oven gives you plenty of space to cook multiple dishes at once.

Easy To Clean

Your hob simply needs a quick wipe to keep it looking good as new for years to come, as the gas hob is made from a single piece of stainless steel that contains spills. The oven door, its inner pane of glass and runners can also be removed for easy cleaning.

Even Heat

Accurate, electronically-controlled oven heat ensures a great result every time.

SPECIFICATIONS

Accessories (included)

Chromed shelf runners	1 set
Flat wire shelf	1
Full extension sliding shelves	1 set (part 578744)
Full extension telescopic shelves	1 set (part 578744)

Where applicable:

All appliances use energy, and energy usage typically generates carbon emissions. **Fisher & Paykel Appliances' In-use Energy Carbon Emissions Estimate** indicates carbon emissions from a product's in-use energy. This is calculated either annually or per cycle, using the product's market-specific energy label energy consumption data multiplied by the carbon emissions factor for energy in your country or region.

Our In-use Energy Carbon Emissions Estimate is designed to assist customers in making informed purchasing decisions when comparing different Fisher & Paykel products. For example, a heat pump dryer typically has a lower In-use Energy Carbon Emissions Estimate than a vented dryer.
