FEATURES & BENEFITS

- Spacious bottom freezer with full extension drawer gives easy access to frozen goods
- ActiveSmart™ Foodcare
  ActiveSmart™ Foodcare learns how you live. It's technology which understands how you use your fridge and adjusts temperature, airflow and humidity inside to help keep food fresher for longer.
- Clever energy
  Your refrigerator adapts to daily use by cooling and defrosting only when needed. This means your refrigerator uses the energy it needs without compromising on food care.
- Water on tap
  The slimline dispenser makes it easy to fill almost any sized jug or vessel with cool filtered water and doesn’t take up any storage space in your refrigerator.
- Easy installation
  Our integrated products are easy to install, whether you are renovating your kitchen or designing a new one. Our refrigerators are designed for minimal gaps with adjustable front and rear feet to allow for uneven floors alongside adjustable door panels that can be customized to match your kitchen.
- Ice maker
  Fresh ice is always available for you in a dedicated freezer bin. Simply turn it off to free up freezer space or during busy times, you can boost ice production by up to 30%.
- Design quality
  Our refrigerators are designed and built using quality materials. We use real stainless steel on our refrigerators and solid glass for shelving.
- Humidity control
  Your fruit and veges need different environments. The humidity control slides in each storage bin create a microclimate that helps keep food fresher for longer.
