## FEATURES & BENEFITS

### Cooktop Power

Sealed Dual Flow Burners™ deliver rangetop power up to 23,500 BTU for seriously fast boiling right down to a precise 140F full surface simmer with the gentlest of flames.

### Precise Control

From the highest to the lowest temperatures you get total control with halo-illuminated rangetop dials. A precise full surface simmer is delivered across all burners.

### Cooking Flexibility

The continuous surface grates are designed for pots and pans to move safely across the rangetop. The deep-platform style grates provide full coverage so heat goes directly onto the pot, for a faster boil.

### Easy To Clean

These rangetops are easy to clean with sealed burners and a continuous, porcelain basepan.

### Information At A Glance

LED halo control dials provide information at a glance and assist in alerting you if any burners are accidentally left on.

### Design Quality

This rangetop is built to last with craftsmanship in every detail, featuring real stainless steel, cast-iron grates, and titanium coated dials.

### Where applicable:

All appliances use energy, and energy usage typically generates carbon emissions. **Fisher & Paykel Appliances' In-use Energy Carbon Emissions Estimate** indicates carbon emissions from a product's in-use energy. This is calculated either annually or per cycle, using the product's market-specific energy label energy consumption data multiplied by the carbon emissions factor for energy in your country or region.

Our In-use Energy Carbon Emissions Estimate is designed to assist customers in making informed purchasing decisions when comparing different Fisher & Paykel products. For example, a heat pump dryer typically has a lower In-use Energy Carbon Emissions Estimate than a vented dryer.
