

76cm Series 9 Professional Compact Combi-Steam Oven

Professional

Get more flexibility in the kitchen with both convection cooking and steam cooking, which reduces the need for oils and fats.

- 37L total capacity
- Steam cooking allows you to cook ingredients in their own juices, to retain nutrients and flavour
- Cooking flexibility with nine oven functions, including five Steam functions, plus Grill and Convection
- Designed to match aesthetically with companion products such as Warming Drawers, for flexible cooking configurations

DIMENSIONS

Height	470 mm
Width	757 mm
Depth	579 mm

FEATURES & BENEFITS

- Healthy Eating**
The Combination Steam Oven allows you to cook ingredients in their own juices to retain nutrients and flavour, with the steam moisture reducing the need for additional oils or fats.
- Sized To Suit**
This 76cm Combination Steam Oven can be placed almost anywhere. All companion products can be installed at a convenient height to suit your kitchen design and preference.
- Simple To Use**
An easy to use, intuitive display provides useful information about functions along with a refill alert.
- Easy Cleaning**
Cleaning the Steam Oven is effortless. After each use, simply wipe the smooth stainless-steel interior with a dry cloth.
- Safe And Sound**
Keep those inquisitive little hands safe. A child lock has been included in the design of this Steam Oven.
- Easy Installation**
Plug in and cook straight away. The Steam Oven is easy to install, with no plumbing needed.

Where applicable:

All appliances use energy, and energy usage typically generates carbon emissions. Fisher & Paykel Appliances' In-use Energy Carbon Emissions Estimate indicates carbon emissions from a product's in-use energy. This is calculated either annually or per cycle, using the product's market-specific energy label energy consumption data multiplied by the carbon emissions factor for energy in your country or region.

Our In-use Energy Carbon Emissions Estimate is designed to assist customers in making informed purchasing decisions when comparing different Fisher & Paykel products. For example, a heat pump dryer typically has a lower In-use Energy Carbon Emissions Estimate than a vented dryer.
