## FEATURES & BENEFITS

### Handleless Design

Effortlessly open and close your oven with a gentle press of a button, ensuring convenience and smooth operation in the kitchen. Moving away from traditional oven doors, this model is an ideal match for kitchens with a continuous, handle-free design, ensuring a seamless flow across the cabinetry.

### Cook With Confidence

Using the large 5" touchscreen interface, you can cook with a favourite method, hero ingredient, cooking function or recipe. Your oven will guide you through the steps, or change the temperature and heat type automatically, depending on your selection.

### Generous Capacity

With a generous 85L total capacity, you can create several perfectly cooked dishes at once using multiple shelves. Non-tip, full-extension shelves help to ensure safe removal of hot dishes.

### Exceptional Performance

Our unique cooking technologies were developed to help deliver perfect results. ActiveVent ensures optimised moisture levels, while AeroTech™ circulates heat evenly for a consistent temperature.

### Self-Cleaning

Pyrolytic self-clean breaks down food residue at a very high temperature, leaving a light ash that's easily removed with a damp cloth. The enamel-coated side racks don't need to be removed when using this function.

### Design freedom

Crafted with premium materials and detailing, this oven supports a cohesive and considered kitchen design. Complement it with our Minimal style Warming Drawer to achieve the ultimate kitchen solution.

**Where applicable:**

All appliances use energy, and energy usage typically generates carbon emissions. **Fisher & Paykel Appliances' In-use Energy Carbon Emissions Estimate** indicates carbon emissions from a product's in-use energy. This is calculated either annually or per cycle, using the product's market-specific energy label energy consumption data multiplied by the carbon emissions factor for energy in your country or region.

Our In-use Energy Carbon Emissions Estimate is designed to assist customers in making informed purchasing decisions when comparing different Fisher & Paykel products. For example, a heat pump dryer typically has a lower In-use Energy Carbon Emissions Estimate than a vented dryer.
