

Series 5 Contemporary Dishwasher

Contemporary

Designed to adapt to every load, this dishwasher combines Auto Cycle sensing, ThermoDry technology and flexible loading features to deliver consistent cleaning and drying performance. An adjustable-height rack, foldable tines, Half Load and Dry+ modifiers help optimise care across everything from delicate glassware to heavy cookware.

- Seven wash programs including 60 min and Eco, plus modifiers like Dry+, Sanitise and Half Load
- Auto Cycle senses how dirty the dishes are and adjusts the wash accordingly

- ThermoDry channels moisture away from dishes at the end of a cycle for efficient drying
- For added peace of mind, Aqua Stop automatically shuts off the water if a leak is detected

DIMENSIONS

Height	850 - 895 mm
Width	597 mm
Depth	600 mm

FEATURES & BENEFITS

80 Years of Clean Dishes

We have spent 80 years obsessing over the science of clean dishes - meticulously calibrating time, temperature, water movement and chemistry to deliver perfect results. That expertise is built into every cycle, where refined wash systems, sensing, and product intelligence work together to tackle everything from everyday loads to baked-on residue with ease.

Careful Consumption, Powerful Performance

Designed to help reduce energy consumption, Eco Cycle balances time and energy to deliver a thorough clean while using up to 30% less energy compared to the Medium cycle. This efficient cycle fits seamlessly into evening routines, so you can wake to clean dishes and a lighter environmental footprint.

Flexible by Design

No two days in the kitchen are the same, so your dishwasher needs to adapt. A height-adjustable upper basket creates space for tall dishes or bulky cookware, while adjustable cup racks and foldable tines let you secure smaller items and easily customise the layout for each load.

Balance in Every Cycle

Not every load demands the same approach. From everyday dishes to heavily soiled cookware, our cycles and modifiers are designed to deliver the right level of care for each wash. Half Load optimises smaller washes, Sanitise provides added hygiene, and Dry+ improves drying performance on plastics for reliable results across every load.

Automatic Intelligence

Everyday routines are made simpler when the details are taken care of for you. Auto Cycle uses sensors to detect how dirty the load is, intelligently adjusting time, temperature, and water use to create the most appropriate wash conditions for each load. The result is consistent cleaning performance with efficient use of resources, wash after wash.

Clean and Dry

Dishes are dry and ready to put away at the end of a cycle with ThermoDry. As warm air cools moisture is drawn away from dishes, for efficient drying and a more convenient dishwashing routine.

Engineered for Life

Trust is earned over time through consistent results. That is why our team of scientists test wash performance using over 100,000 pieces of cutlery and crockery each year. By carefully analysing soil removal, water and energy consumption, we continuously refine our cycles to deliver proven consistency, wash after wash, transforming dishwashing routines into rituals.

SPECIFICATIONS

Capacity and loading

Accommodates round plates up to (lower basket)	320mm
Accommodates round plates up to (top basket)	250mm

Adjustable height, foldable cupracks	•	Motor type	Asynchronous	Eco	•

Where applicable:

All appliances use energy, and energy usage typically generates carbon emissions. **Fisher & Paykel Appliances' In-use Energy Carbon Emissions Estimate** indicates carbon emissions from a product's in-use energy. This is calculated either annually or per cycle, using the product's market-specific energy label energy consumption data multiplied by the carbon emissions factor for energy in your country or region.

Our In-use Energy Carbon Emissions Estimate is designed to assist customers in making informed purchasing decisions when comparing different Fisher & Paykel products. For example, a heat pump dryer typically has a lower In-use Energy Carbon Emissions Estimate than a vented dryer.
