

Freestanding Cooker, Induction, 90cm, 5 Zones with SmartZone

Series 7 | Classic

White

- Heritage styling with contemporary performance in the large convection oven and induction cooktop, with SmartZone capability.
- Five cooking zones, with the ability to pair zones to create SmartZones
 - Convection oven with 140L total capacity and nine oven functions including Pastry Bake with pizza mode and rapid proof for making bread
 - Non-tip full-extension shelves for safe removal of hot dishes

DIMENSIONS

Height	898 - 946mm
Width	897mm
Depth	600mm

FEATURES & BENEFITS

- Multi-Shelf Cooking**
Our AeroTech™ system circulates air evenly throughout the entire oven so dishes on the top shelf turn out just as perfectly as food cooking on the bottom shelf.
- Quality and durability**
Every detail has been carefully crafted. The solid, perfectly balanced soft-close door, durable cooktop and glowing halo dials all add up to an exceptional, premium range.

- POWER & CONTROL**
Instant and immediate control from the highest to the gentlest heat. The finely tuned cooktop controls let you sear, stir fry or simmer a delicate sauce to perfection.
- Even Heat**
Accurate, electronically-controlled oven heat ensures a great result every time.
- Large Capacity Oven**
The generous 140L total capacity oven gives you plenty of space to cook multiple dishes at once.
- Large, Flexible Cooking Area**
SmartZone links two cooking zones and controls them as one, giving you the flexibility to use large pans and griddles and easily handle bigger food items such as a whole fish.

SPECIFICATIONS

Accessories

The product dimensions and specifications in this page apply to the specific product and model. Under our policy of continuous improvement, these dimensions and specifications may change at any time. You should therefore check with Fisher & Paykel's Customer Care Centre to ensure this page correctly describes the model currently available. Fisher & Paykel Appliances Ltd 2020

Where applicable:

All appliances use energy, and energy usage typically generates carbon emissions. **Fisher & Paykel Appliances' In-use Energy Carbon Emissions Estimate** indicates carbon emissions from a product's in-use energy. This is calculated either annually or per cycle, using the product's market-specific energy label energy consumption data multiplied by the carbon emissions factor for energy in your country or region.

Our In-use Energy Carbon Emissions Estimate is designed to assist customers in making informed purchasing decisions when comparing different Fisher & Paykel products. For example, a heat pump dryer typically has a lower In-use Energy Carbon Emissions Estimate than a vented dryer.
