

Double Oven, 30", 11 Function, Self-cleaning

Series 9 | Contemporary

Stainless Steel

Choose maximum capacity, combining two independent ovens so you can cook multiple dishes simultaneously.

- 4.1 + 4.1 cu ft total capacity across two oven cavities
- 11 oven functions including Roast and Aero™ Pastry
- High-temperature self-cleaning function breaks down food residue for an easy clean
- Non-tip, full-extension shelves for safe removal of hot dishes

DIMENSIONS

Height	48 7/16"
Width	29 29/32"
Depth	23 29/32"

FEATURES & BENEFITS

Even cooking
Our built-in ovens feature AeroTech™ - a technology that circulates heat evenly, ideal for multi-shelf cooking.
Self Cleaning
The self-clean function breaks down food residue at a very high temperature, leaving a light ash that's easily removed with a damp cloth. For best results, wipe down the inside of your oven door before you use the self-clean function.
Safe And Sound
The CoolTouch door with triple glazing and cooling system is safe to touch from the outside, protecting your hands and the

surrounding cabinetry. Getting large dishes in and out of the oven is a breeze with full telescopic sliding shelves that stay perfectly steady - even when pulled all the way out.

Sized To Suit
Designed for multi-shelf cooking, this is one of the largest built-in ovens on the market providing two cavities with 4.1 cu.ft of total capacity. The higher internal cavities allow you to fit a large casserole dish, the family roast and a pie for dessert.

Complementary Design
With their premium handle styling and stainless steel finish, our built-in ovens are designed to match the rest of Fisher & Paykel's kitchen appliance family.

Cooking Flexibility
This built-in oven has 11 functions with pre-set temperatures, including Bake, Aero™ Bake and Fan Forced allowing you to use a variety of cooking styles.

SPECIFICATIONS

The product dimensions and specifications in this page apply to the specific product and model. Under our policy of continuous improvement, these dimensions and specifications may change at any time. You should therefore check with Fisher & Paykel's Customer Care Centre to ensure this page correctly describes the model currently available. Fisher & Paykel Appliances Ltd 2020

Where applicable:

All appliances use energy, and energy usage typically generates carbon emissions. Fisher & Paykel Appliances' In-use Energy Carbon Emissions Estimate indicates carbon emissions from a product's in-use energy. This is calculated either annually

or per cycle, using the product's market-specific energy label energy consumption data multiplied by the carbon emissions factor for energy in your country or region.

Our In-use Energy Carbon Emissions Estimate is designed to assist customers in making informed purchasing decisions when comparing different Fisher & Paykel products. For example, a heat pump dryer typically has a lower In-use Energy Carbon Emissions Estimate than a vented dryer.
