FEATURES & BENEFITS

Variable temperature zones

There's more than one way to freeze food, and different freezing temperatures and techniques affect food care – and your levels of convenience – in different ways. Optimal freezing is a question of what you're storing, how fresh it is, and when you plan to consume it. Change a compartment to Soft Freeze to enjoy maximum everyday convenience, or to Freeze Mode or Deep Freeze Mode to retain natural goodness for future use.

DEEP FREEZE MODE

Deep freezing (-25°C) allows food to be stored for months or even years with temperatures that halt bacterial activity. Freezing food quickly is the key to protecting quality and retaining nutrients, so they are not lost when defrosting.

Mix & match

Integrated Column Refrigeration gives you the freedom to mix and match. Different sized Column Refrigerators and Freezers can be installed separately or paired. Finish them with our stainless steel door panels or customise to match your own kitchen cabinetry.

Appealing illumination

Bright LEDs light up each ceiling, shelves, bins and trays in both refrigerator and freezer, making it easy to find your food and creating a welcoming glow in your kitchen for those midnight snacks.

Clever energy

Our ActiveSmart™ Foodcare Refrigerator Freezers adapt to daily use by cooling and defrosting only when needed. This means your refrigerator uses the energy it needs without compromising on food care.

Design quality

The premium design and quality finish includes a steel interior lining as well as full-extension metal shelf runners for easy access, and robust glass shelving.

Easy install

Integrated Column Refrigerators and Freezers have been developed to make their installation easy. The joiner kit is included when pairing refrigerators and freezers. All models come with front adjustable levelling feet and they've been designed to easily slide into place as separate units.
