10kg Series 7 Contemporary Front Loader Washer, FlexiDose

Series 7 | Front Load

Graphite

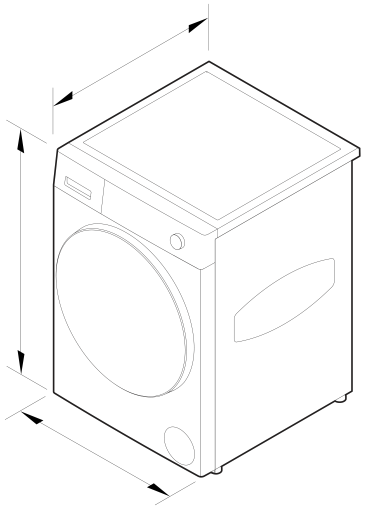

An advanced Front Loader Washer with a rich, responsive interface. Intuitive controls and extra flexibility bring simplicity and convenience to every cycle.

- Advanced care for 6 fibre types, including Down and Wool
- Vibrant 3.7” screen with dial for simple cycle selection
- Flexi Dose for customised Auto Dose of up to 21 washes without refilling
- Connect SmartHQ™ for real-time updates, guides and extra functions

DIMENSIONS

Height	850 mm
Width	602 mm
Depth	661 mm

FEATURES & BENEFITS

ADVANCED CARE FOR EVERYDAY

Fisher & Paykel Series 7 Washers put control at your fingertips with a vivid 3.7" display and dial, for effortless fabric care with every wash. From crisp Cotton and delicate Down to Woolmark Black certified Wool cycles, intelligent technology automatically adjusts the wash for each fibre type, delivering a perfect clean while protecting fabrics. Options for item type, colour and soil level further refine the wash, ensuring optimal care to extend the life your garments.

STEAM REFRESH

Gently relax fibres to reduce wrinkles and odours with Steam Refresh. Perfect for a Down jacket or duvet, steam restores shape, softness and freshness in minutes without a full wash. By adding just the right amount of moisture and movement, steam helps revive compressed Down fibres, restoring softness, shape, and improving fluffiness so your garments look and feel their best.

CUSTOMISED AUTO DOSE, IDEAL FOR DOWN

Everyday routines are simpler when the details are taken care of for you. Auto Dose helps preserve the loft, softness, and warmth of Down, protecting the natural oils in the fibres that keep it insulating. It dispenses the optimal amount of detergent and softener for each load, while Active Mix blends detergent with water to reach deep into fibres. Two FlexiDose reservoirs let you use detergent, softener, or a specialised formula when needed — storing enough for up to 21 washes when both are used for detergent.

GENTLE AND HYGIENIC

Keep garments hygienic with two sanitising options, both proven to eliminate 99.9% of bacteria*. UV Sanitise works at low temperatures, ideal for heat-sensitive fibres like Elastane that can degrade under high heat. For more durable fabrics, hot water Sanitise delivers a traditional-high temperature clean. *UV Sanitise independently certified to eliminate 99.9% of Staphylococcus aureus and Escherichia coli using the Cotton Fibre Type, Durable Item Type, Sanitise Treatment, Dark Colour, Moderate Soil Level and Manual Auto Dose settings. Sanitise independently certified to eliminate 99.9% of Staphylococcus aureus and Escherichia coli using the Mixed Fibre Type, Moderate Item Type, Sanitise Treatment, Mixed Colour, Moderate Soil Level and Manual Auto Dose settings.

WASHING THAT WAITS FOR YOU

Prevent wrinkles from setting in with crease free. Fibres like Cotton are naturally strong and durable, but their structure reacts to heat and water, causing fabrics to crease — especially in larger items like Sheets. By gently tumbling the load after a wash, Crease Free keeps Sheets moving, reducing wrinkles and helping them stay smooth until you’re ready to unload.

CLASS-LEADING EFFICIENCY

Designed to reduce running costs and environmental impact with 5-star energy and 5-star water ratings, you can trust that your fabric care routine is both effective and sustainable. The SmartDrive™ motor ensures quiet operation and long-lasting reliability, with fewer moving parts for reduced wear over time.

REFINED FORM, INTUITIVE FUNCTION

Our most perfect pair yet, reimagined for modern living. With an angled, 3.7" full-colour interface and dial, plus a newly positioned lint filter on the dryer it offers a seamless fabric care experience, elevated beyond the utility space. Designed to complement one another in both form and function, our Front Loader Washers and Heat Pump Dryers feature refined materials, large doors and complementary cycles that work in harmony to care for a wide range of fibres.

SPECIFICATIONS

Capacity

Capacity	10 kg

Water Label

Where applicable:

All appliances use energy, and energy usage typically generates carbon emissions. **Fisher & Paykel Appliances' In-use Energy Carbon Emissions Estimate** indicates carbon emissions from a product's in-use energy. This is calculated either annually or per cycle, using the product's market-specific energy label energy consumption data multiplied by the carbon emissions factor for energy in your country or region.

Our In-use Energy Carbon Emissions Estimate is designed to assist customers in making informed purchasing decisions when comparing different Fisher & Paykel products. For example, a heat pump dryer typically has a lower In-use Energy Carbon Emissions Estimate than a vented dryer.
