QUICK REFERENCE GUIDE > RF306RDWX1

Wine Cabinet, 127 Bottle

Series 7 | Contemporary

Stainless Steel

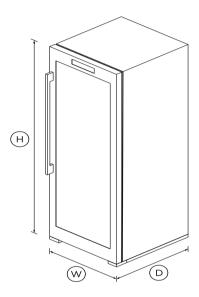

This stylish stainless steel Wine Cabinet provides a stable temperature and humidity environment for your wine collection, no matter the varietal.

- 127 bottle capacity
- With dual temperature zones, to ensure you can perfectly store wines of all varieties
- · Brushed metal handle

DIMENSIONS

Height 1660mm
Width 595mm
Depth 639mm

FEATURES & BENEFITS

TOTAL CONTROL

Maintaining the perfect environment for your red and white wines is easy with the dual zones in your wine cabinet. The control panel gives you the ability to set each zone to between 5°C and 20°C and to adjust LED lighting and fans.

COMPLETE VISIBILITY

Your wine collection is always on display through UV tempered glass and LED lighting. Bottles nestle on stylish oak slide out shelves and a top shelf tilts so you can showcase your favourite

wines.

STORAGE PERFECTED

The fan helps circulate air inside your wine cabinet while oak shelves and a low vibration compressor ensure optimal storage. The UV tempered glass door reduces the risk of external light affecting your wine.

DESIGNED TO MATCH

Our wine cabinets are designed to match the Fisher & Paykel family of products with stylish brushed stainless steel and glass doors which complement any kitchen.

The product dimensions and specifications in this page apply to the specific product and model. Under our policy of continuous improvement, these dimensions and specifications may change at any time. You should therefore check with Fisher & Paykel's Customer Care Centre to ensure this page correctly describes the model currently available. Fisher & Paykel Appliances Ltd 2020

Where applicable:

All appliances use energy, and energy usage typically generates carbon emissions. Fisher & Paykel Appliances' In-use Energy Carbon Emissions Estimate indicates carbon emissions from a product's in-use energy. This is calculated either annually or per cycle, using the product's market-specific energy label energy consumption data multiplied by the carbon emissions factor for energy in your country or region.

Our In-use Energy Carbon Emissions Estimate is designed to assist customers in making informed purchasing decisions when comparing different Fisher & Paykel products. For example, a heat pump dryer typically has a lower In-use Energy Carbon Emissions Estimate than a vented dryer.
