 - With 'Add a Garment' function, allowing you to pause your wash and add an item
 - Energy Star certified
 - With our matching Condensing Dryer you have a perfect pair for your laundry

DIMENSIONS

Height 33 1/4 - 33 5/8 "

Width 23 7/16 "
Depth 25 3/8 "

FEATURES & BENEFITS

- Smartdrive(Tm) Technology**
SmartDrive™ Technology is a gentle, quiet, and efficient combination of smart electronics and a direct drive motor that senses the load to deliver better fabric care.
- Steam Clean**
The Steam function opens up the fibers within the fabric, helping the wash cycle and cleaning agent to do their job more effectively. The result is a superior wash.
- Time Saver Option**
The Time Saver option activates a special temperature profile and unique tumble sequence to speed things up when you are in a rush.
- Protect Your Woolens**

Our Wool cycle has a Woolmark™ guarantee so you can wash your woolen garments with confidence.

- Drum Clean**
The Drum Clean cycle flushes out the drum minimizing the chance of unwanted smells developing. A handy reminder to activate the Drum Clean function occurs after every 100 wash cycles.
- Add a Garment**
The Add a Garment feature allows you to quickly add or remove any size garment mid cycle. Simply press the Add a Garment button and the door will unlock. If the drum water is too high, just enough will be drained out before the door is unlocked.

SPECIFICATIONS

Accessories (sold separately)

Stacking Kit

Capacity

Capacity 2.4 kg
Capacity 2.4 cu ft

Consumption

Energy rating Energy Star
Water consumption per cycle 61L

Where applicable:

All appliances use energy, and energy usage typically generates carbon emissions. Fisher & Paykel Appliances' In-use Energy Carbon Emissions Estimate indicates carbon emissions from a product's in-use energy. This is calculated either annually or per cycle, using the product's market-specific energy label energy consumption data multiplied by the carbon emissions factor for energy in your country or region.

Our In-use Energy Carbon Emissions Estimate is designed to assist customers in making informed purchasing decisions when comparing different Fisher & Paykel products. For example, a heat pump dryer typically has a lower In-use Energy Carbon Emissions Estimate than a vented dryer.
