

# 48" Series 9 8 Burner Gas Rangetop, Natural Gas

Professional

Eight burners for when you need maximum performance and cooktop space – great for those who love to cook for a crowd.

- Your burners can deliver anything from very high 23,500 BTU heat for seriously fast boiling, to the most gentle flame for simmering
- Continuous surface grates designed for pots and pans to move safely across the cooktop

## DIMENSIONS

|        |          |
|--------|----------|
| Height | 8 5/16 " |
| Width  | 47 7/8 " |
| Depth  | 28 "     |

## FEATURES & BENEFITS

**Perfect Heat**  
Sealed Dual Flow Burners™ deliver rangetop power up to 23,500 BTU (NG models) for seriously fast boiling right down to a precise 140°F full surface simmer with the gentlest of flames.

**Precise Control**  
From the highest to the lowest temperatures you get total control with halo-illuminated rangetop dials. A precise full surface simmer is delivered across all burners.

**Cooking Flexibility**  
The continuous surface grates are designed for pots and pans to move safely across the rangetop. Full coverage, deep-platform style grates are designed so heat goes directly onto the pot rather than the grates themselves, for a faster boil and energy efficiency.

**Information At A Glance**  
LED halo control dials provide information at a glance and assist in alerting you if any burners are accidentally left on.

**Easy Cleaning**  
These rangetops have sealed burners and a single sheet cooking surface which, combined with a commercial-style stainless steel finish and dishwasher-safe grates, allow easy cleaning.

**Complementary Design**  
Built to last with distinctive, bold styling, this rangetop is designed to match the Fisher & Paykel Professional style family of appliances.

## SPECIFICATIONS

| Burner ratings         |          |
|------------------------|----------|
| Maximum burner power   | Yes      |
| Power back centre      | 18500BTU |
| Power back centre (2)  | 18500BTU |
| Power back left        | 18500BTU |
| Power back right       | 18500BTU |
| Power front centre     | 18500BTU |
| Power front centre (2) | 18500BTU |
| Power front left       | 23500BTU |

Where applicable:

All appliances use energy, and energy usage typically generates carbon emissions. Fisher & Paykel Appliances' In-use Energy Carbon Emissions Estimate indicates carbon emissions from a product's in-use energy. This is calculated either annually or per cycle, using the product's market-specific energy label energy consumption data multiplied by the carbon emissions factor for energy in your country or region.

Our In-use Energy Carbon Emissions Estimate is designed to assist customers in making informed purchasing decisions when comparing different Fisher & Paykel products. For example, a heat pump dryer typically has a lower In-use Energy Carbon Emissions Estimate than a vented dryer.
