

# 83cm Series 9 Minimal 4 Zone Induction Hob with Integrated Ventilation

Minimal

<p>A true two-in-one appliance, this hob combines the precision of induction cooking with powerful extraction in one seamless, stylish hob.</p>

- Seamless kitchen integration, without the need for overhead ventilation
- Four cooking zones, including simple pairing of two zones to create a SmartZone
- With nine fan speeds plus boost, select the perfect extraction rate for your cooking

- Minimal style, sleek black glass finish to suit any kitchen design

## DIMENSIONS

Height	217 mm
Width	830 mm
Depth	515 mm

## FEATURES & BENEFITS

### Seamless Integration

Offering true design freedom, this cooktop can be placed anywhere – eliminating the need for bulky overhead ventilation and helping to create a seamless flow between kitchen and living spaces. Installed raised or flush, it's perfect for islands, or homes with high ceilings.

### Elegant Design

The subtle black glass and durable matte black detailing blend elegance with durability. With premium styling, these hobs seamlessly blend with other appliances for a cohesive, considered kitchen design.

### Precise Control

Fisher & Paykel induction cooktops offer extremely accurate temperature control from very high to very low heats, so you can sear, sauté and temper like a pro. Touch&Slide controls react immediately when you adjust the temperature, so you can go from a boil to a simmer in seconds.

### Effective Extraction

Designed for busy homes, the integrated ventilation works effectively and unobtrusively in the background by recirculating vented air. Featuring nine fan speeds, plus a boost function, for quickly removing odours and steam.

### Safety Of Induction

Induction cooktops only start heating your pot or pan once you've placed it on the surface and stop as soon as you remove it – so they are safer for everyone.

### Ease Of Use

Designed for simple removal, the grease filter tray effectively captures spills, while the single glass cooking surface can be easily wiped clean. A flush ventilation grille allows pots to effortlessly slide across the cooktop surface.

### Superior Efficiency

Less heat is wasted during induction cooking because only the cookware is heated, not the cooktop surface. This makes induction cooking more energy-efficient than electric or gas cooktops.

## SPECIFICATIONS

### Cleaning

Dishwasher safe grease filter	•
Flat easy clean glass surface	•
Flush grille	•
Odour filter	3x Ceramic

### Consumption

Energy rating	A+

**Performance**

**Where applicable:**

All appliances use energy, and energy usage typically generates carbon emissions. **Fisher & Paykel Appliances' In-use Energy Carbon Emissions Estimate** indicates carbon emissions from a product's in-use energy. This is calculated either annually or per cycle, using the product's market-specific energy label energy consumption data multiplied by the carbon emissions factor for energy in your country or region.

Our In-use Energy Carbon Emissions Estimate is designed to assist customers in making informed purchasing decisions when comparing different Fisher & Paykel products. For example, a heat pump dryer typically has a lower In-use Energy Carbon Emissions Estimate than a vented dryer.
