INSTALLATION INSTRUCTIONS

DishDrawer™ dishwasher
DD36SDFTX2 (Designer) & DD36STI2 (Integrated) models

US CA

Fisher & Paykel
**SAFETY AND WARNINGS**

**WARNING!**

**Electrical hazard**

Before installing the dishwasher, remove the house fuse or open the circuit breaker. If permanently connecting the dishwasher, be sure the power is isolated and the dishwasher unplugged.

**GROUNDING INSTRUCTIONS**

This appliance must be grounded. In the event of a malfunction or breakdown, grounding will reduce the risk of electric shock by providing a path of least resistance for electric current. This appliance is equipped with a cord having an equipment-grounding conductor and a grounding plug. The plug must be plugged into an appropriate outlet that is installed and grounded in accordance with all local codes and ordinances. **WARNING** - Improper connection of the equipment-grounding conductor can result in a risk of electric shock. Check with a qualified electrician or service representative if you are in doubt as to whether the appliance is properly grounded.

If the dishwasher is installed as a permanently connected appliance: **GROUNDING INSTRUCTIONS** - This appliance must be connected to a grounded metal, permanent wiring system, or an equipment-grounding conductor must be run with the circuit conductors and connected to the equipment-grounding terminal or lead on the appliance. Do not modify the power supply plug provided with the appliance - if it will not fit the outlet, have a proper outlet installed by a qualified electrician. Do not use an extension cord, adapter plug or multiple outlet box.

Failure to follow this advice may result in electrical shock or death.

**WARNING!**

**Cut hazard**

Take care - panel edges are sharp.

Failure to use caution could result in injury or cuts.

**Very Heavy**

95 lb 43 kg

Do not attempt to lift this product unassisted.

Lifting unassisted may cause serious injury.

**ADDITIONAL SAFETY AND WARNINGS - INTEGRATED MODELS ONLY**

**WARNING!**

**Electrical Shock Hazard**

**WARNING**: To reduce the risk of electrical shock, fire, or injury to persons, the installer must ensure that the dishwasher is completely enclosed at the time of installation. Before fitting the front panel, make sure that the dishwasher is disconnected from the power supply. After installing the front panel, the installer must ensure that the following components are electrically grounded: the panel bracket and any custom metal component (e.g. handle) that extends past the rubber door seal.

Failure to follow these warnings may result in electrical shock, injury or fire.

**IMPORTANT SAFETY INSTRUCTIONS!**

- Installation of this dishwasher requires basic mechanical and electrical skills.
- Be sure to leave these Instructions with the Customer.
- Installation must comply with your local building, electricity, and plumbing regulations.
- At the completion of the dishwasher installation, the Installer must perform the Final Checklist.
- Remove all packaging materials supplied with the dishwasher.
- This dishwasher is manufactured for indoor use only.
- Ensure all water connections are turned OFF. It is the responsibility of the plumber and electrician to ensure that each installation complies with all Codes and Regulations.
- The dishwasher MUST be installed to allow for future removal from the enclosure if service is required.
- The switched power outlet must be outside the dishwasher cavity, so that it is accessible after installation.
- Care should be taken when the appliance is installed or removed to reduce the likelihood of damage to the power supply cord and hoses.
- If the dishwasher is to be relocated from one installation to another it must be kept upright to avoid damage from water spillage.
- Make sure only new hoses are used for connection (supplied with the dishwasher). Old hoses should not be reused.
- Failure to install the dishwasher correctly could invalidate any warranty or liability claims.
- If the product is installed in a motor vehicle, boat or similar mobile facility, you must bring the vehicle, boat or mobile facility containing the product to the service shop at your expense or pay the service technician's travel to the location of the product.

SAVE THESE INSTRUCTIONS
PARTS SUPPLIED - ALL MODELS

- Drain hose support (1)
- Drain hose joiner (1)
- Wire clip (1) (for securing Drain hose joiner)
- Side mounting bracket kit (A and B) (2) OPTIONAL
- Clamp (1) (for securing Drain hose joiner)
- Phillips 5/8" (16 mm) screws (7)
- 1 1/2" (38 mm) bottom fixing screws & metal washers (2)
- Rubber washer for inlet hose (1) (comes already fitted)
- Moisture protection tape (1) (to prevent moisture damage)
- Edge Protector (1) (If the services hole is through a metal partition the hole must be protected with the Edge protector supplied to prevent damage to the power cord or hoses.)
- Drain hose support (1)
- Drain hose joiner (1)
- Wire clip (1) (for securing Drain hose joiner)
- Side mounting bracket kit (A and B) (2) OPTIONAL
- Clamp (1) (for securing Drain hose joiner)
- Phillips 5/8" (16 mm) screws (7)
- 1 1/2" (38 mm) bottom fixing screws & metal washers (2)
- Rubber washer for inlet hose (1) (comes already fitted)
- Moisture protection tape (1) (to prevent moisture damage)

If the Drain hose supplied is not long enough to reach your services, you must use a Drain Hose Extension Kit P/N 525798 which will extend the drain hoses by 11' 10" (3.6m).

The kit is available from the nearest Fisher & Paykel Authorized Service Center, or Toll free 1.888.936.7872 or www.fisherpaykel.com

ADDITIONAL PARTS SUPPLIED WITH INTEGRATED MODELS

- External Venting kit (1)
- Panel bracket (1) (attached to product)
- Panel mounting screws (14)

*Recommended

---

**Important!**

Ensure correct chassis position. In order for product to function, cabinetry must not block the drawer front from closing hard against the chassis.

---

Minimum clearances from adjacent cabinetry:
- min. ⅜" (13 mm) clearance from a corner cupboard
- min. ⅛" (2 mm) clearance to adjacent cupboard door
FRONT PANEL SPECIFICATIONS

- \( \frac{5}{8} - \frac{13}{16} \) (16-20 mm) panel thickness
- Maximum weight of panel: 20 lb (9 kg)
- Adequately sealed to withstand moisture (122°F/50°C @ 80% RH).
  Because of it being a hot and wet environment generally, the back and
  sides of the panel should be completely sealed with a waterproof vapor
  barrier (ie polyurethane) to prevent damage to the panel.
- The back of the panel (including any integrated handle) should be
  completely flush so that the seal between the panel and the rubber trim
  is maintained.

The following calculations assume the top of the panel is aligned
with the top of the adjacent cabinetry:

WIDTH OF THE PANEL

Measure A (the width between adjacent door/drawer fronts)
and write it in the first box below, then complete the equation.

\[ A - 2X = \text{WIDTH OF PANEL} \]

HEIGHT OF THE PANEL

Measure B and write it in the first box below, then complete
the equation.

\[ B - \text{ventilation gap (min. \( \frac{1}{16} \) (2 mm))} = \text{HEIGHT OF PANEL} \]

Note: when the top of the dishwasher has to be lower than the
adjacent cabinetry, the panel can be increased in height.
**OPTIONALLY HARD WIRING PRIOR TO INSTALLATION**

### REMOVE THE DRAWER

1. Press the release tabs in on either side and push back to release drawer from runners.

2. Remove knock-out for cable clamp and fit a suitable cable clamp for the conduit.

3. Use copper conductors only.

4. To prevent kinked hoses, we recommend rotating the drawer counter-clockwise and resting it on its side after removal.

5. Ensure the release tabs on both sides are reset fully.

6. Ensure the release tabs on both sides are reset fully.

7. Before refitting the drawer, ensure the hoses are not twisted and the latches at the rear of each drawer runner are facing forward.

### TERMINATE THE WIRING AS SHOWN

**WARNING!**

**Electrical Shock Hazard**

Before continuing, ensure that the product is disconnected from the power supply. Failure to follow this warning may result in electrical shock, injury or fire.

**Before continued, ensure that the product is disconnected from the power supply. Failure to follow this warning may result in electrical shock, injury or fire.**

### REMOVE THE ACCESS COVER & POWER CORD

8. Pull forward the release tabs on both sides 4"(100mm).

9. Ensure the drawer is now rotated clockwise back.

10. Before refitting the drawer, ensure the hoses are not twisted and the latches at the rear of each drawer runner are facing forward.

11. Ensure the release tabs on both sides are reset fully.

12. **Product may move. Mark chassis position on cavity**

13. **Press the release tabs in on either side and push back to release drawer from runners.**

14. Access cover

15. **Remove knock-out for cable clamp and fit a suitable cable clamp for the conduit.**

16. **Use copper conductors only.**

17. **Remove the drawer onto the runners & close**

18. **Before refitting the drawer, ensure the hoses are not twisted and the latches at the rear of each drawer runner are facing forward.**
Important! Adjacent cabinetry must not extend above cavity base.

Important! The power outlet must be located in a cabinet adjacent to the dishwasher cavity. 110-120 VAC max. 15 A

Moisture protection tape must be applied.

- These marks indicate formed bracket screw locations, if securing by drawer removal.
- If there is no side partition, you can construct timber bracing as something to secure into.

Water Pressure

- Models without water softener
  Max. 1 MPa (145 psi)
  Min. 0.03 MPa (4.3 psi)

Water softener models
- Max. 1 MPa (145 psi)
- Min. 0.1 MPa (14.5 psi)

Water Connection

Recommended HOT (Maximum 140°F/60°C).

Supplied hose to suit 3/8" (9 mm) male compression fitting.

Services hole

- Can be located either side of dishwasher, preferably at the bottom of the cavity, as shown. If adequate clearance, services hole can be made higher to clear toekick space. If hole is higher, ensure drain hose(s) are routed straight into the waste connection.
- If the hole is through wood, make sure its edges are smooth and rounded.
- If the hole is through metal, ensure you fit the supplied Edge Protector to prevent damage to the power cord.
**INTEGRATED MODELS ONLY - PREPARATION FOR EXTERNAL VENTING THROUGH SAME CABINET**

Important!
To prevent pooling of condensation from the vent hose, a toekick height of no less than 4” (100 mm) is required.

**INTEGRATED MODELS ONLY - PREPARATION FOR EXTERNAL VENTING THROUGH ADJACENT CABINET**

Important!
To prevent pooling of condensation from the vent hose, a toekick height of no less than 4” (100 mm) is required.
MAXIMUM DISTANCE OF HOSES & CORD FROM CHASSIS EDGE

**Left hand side**
- **Drain hose** - 78 ½" (2000 mm)
- **Inlet hose** - 64 ¾" (1650 mm)
- **Power cord (excl. plug)** - 29 ½" (750 mm)
- **Venting hose** - 49 13⁄16" (1265 mm)  
  *(Integrated models only)*

**Right hand side**
- **Drain hose** - 59 ¼" (1500 mm)
- **Inlet hose** - 37 ⅛" (950 mm)
- **Power cord (excl. plug)** - 15 ¾" (400 mm)
- **Venting hose** - 75 ¾" (1925 mm)  
  *(Integrated models only)*
NOW CHOOSE WHICH INSTALLATION METHOD (a) or (b) IS MORE SUITABLE FOR YOUR CABINETRY...

RECOMMENDED METHOD (a) - SECURE WITHOUT DRAWER REMOVAL (FRAMELESS CABINETRY ONLY)

9a ATTACH SIDE MOUNTING BRACKETS

Clip all four side mounting brackets into their slots using a flat-bladed screwdriver. Ensure they’re securely fitted before sliding product into cavity. The mounting slots are in pairs, one on each side diagonally across the product. A bracket must match A slot and B bracket must match B slot.

10a INTEGRATED ONLY - ATTACH VENTING HOSE

Check that the fitted elbow is rotated left or right (depending on the direction of the routing), then ensure the venting hose is securely attached to it.
**11a PULL THROUGH HOSES & MOVE INTO THE CAVITY**

As you push product in, pull through hoses and cord, ensuring they don't get kinked or twisted.

**Important!**
Ensure correct chassis position. In order for product to function, cabinetry must not block the front panel from closing hard against the chassis.

**Important!**
If product cannot be pushed in far enough, pull out again and rearrange hoses and cord. Do not use excessive force, as doing so may squash the hoses and lead to incorrect operation.

**12a SECURE THE DRAWER**

Open the drawer halfway. Using a flat-bladed screwdriver, prise the gray rubber plug out of the trim moulding.

Replace the gray rubber plug back into the trim moulding and ensure the trim seal is facing forward.

Using a small Philips screwdriver, screw through the trim moulding, securing the side mounting bracket to the cabinetry. Do not damage the rubber trim seal.

Repeat for all four brackets.

**13a INTEGRATED ONLY - SECURE THE EXTERNAL VENT**

After routing the vent hose through and out the hole cutout, attach and secure the vent by tightening the four screws provided.

After}

Vent Hose (Integrated models only)

vent either through same cabinet or adjacent cabinet as per step 7b or 7c

Airflow
ALTERNATIVE METHOD (b) - SECURE BY DRAWER REMOVAL

9b INTEGRATED ONLY - ATTACH VENTING HOSE
Check that the fitted elbow is rotated left or right (depending on the direction of the routing), then ensure the venting hose is securely attached to it.

10b PULL THROUGH HOSES & MOVE INTO THE CAVITY
As you push product in, pull through hoses and cord, ensuring they don't get kinked or twisted.

Important!
If product cannot be pushed in far enough, pull out again and rearrange hoses and cord. Do not use excessive force, as doing so may squash the hoses and lead to incorrect operation.
**REMOVE THE DRAWER**

1. Product may move. Mark chassis position on cavity.

2. Press the release tabs in on either side and push back to release drawer from runners.

3. 4” (100 mm)

4. Push drawer runners back in.

5. Ensure the release tabs on both sides are reset fully.

**REFIT THE DRAWER ONTO THE RUNNERS**

1. Pull forward the release tabs on both sides 4” (100 mm).

2. Ensure the drawer is now rotated clockwise back.

3. Ensure the release tabs on both sides are reset fully.

4. Before refitting the drawer, ensure the hoses are not twisted and the latches at the rear of each drawer runner are facing forward.

5. Ensure the hoses are not twisted and the latches at the rear of each drawer runner are facing forward.

**SECURE THE DRAWER TO THE CABINERTY**

1. The product has three pairs of fixing points:
   - A pair of fixing holes either side on the bottom (use 1½” (38 mm) fixing screws & washers)
   - Two pairs of formed brackets on either side of the chassis (use ⅝” (16 mm) screws)

2. Ensure the sound insulation is repositioned correctly.

**INTEGRATED ONLY - SECURE THE EXTERNAL VENT**

1. After routing the vent hose through and out the hole cutout, attach and secure the vent by tightening the four screws provided.

2. Airflow

3. Ensure the sound insulation is repositioned correctly.
**INTEGRATED MODELS ONLY - INSTALLING THE FRONT PANEL**

**15 REMOVE BRACKET FROM PRODUCT**

- **WARNING!**
  - **Electrical Shock Hazard**
  - Before continuing, ensure that the product is disconnected from the power supply.
  - Failure to follow this warning may result in electrical shock, injury or fire.

**16 ATTACH PANEL TO PANEL BRACKET**

- **Important!**
  - Use all 14 screws provided as shown.
  - Align bottom of panels with bottom of brackets.

**17 GROUND THE PANEL**

- **WARNING!**
  - **Electrical Shock Hazard**
  - To ground (earth) the panel bracket, connect the ground (earth) wire from the product to one of the tabs. Any custom metal component (e.g. handle) that extends past the rubber door seal must be grounded (earthed) too.
  - Failure to follow these warnings may result in electrical shock, injury or fire.

**18 ATTACH PANEL TO PRODUCT**

- **Important!**
  - Ensure the rubber seal between the drawer and panel is kept in place.
  - We recommend pushing the drawer runners back 4” (100 mm) before attaching the panel. Once the panel is fitted, ensure the runners are fully back into position and the release tabs on both sides are reset fully.

When refitting the door pins, ensure they are orientated as shown.
ADJUST PANEL HEIGHT TO ALIGN THE CABINETRY GAPS

Insert an appropriately sized Philips screwdriver into the hole above the door pin and rotate the panel up or down to align the gaps in your cabinetry.

Repeat on the other side if necessary.

The panel has a maximum travel of $\frac{1}{8}''$ (2 mm) up or down.

**Important!**

*Integrated models:* Ensure that you maintain a minimum of $\frac{1}{8}''$ (2 mm) ventilation gap below the panel.

*Designer models:* Ensure you maintain a minimum of $\frac{5}{8}''$ (8 mm) ventilation gap below the panel.
THERE ARE THREE DIFFERENT PLUMBING AND DRAINAGE OPTIONS. CHOOSE WHICH IS MORE SUITABLE.

Dishwasher and Standpipe Ø 1½” (38 mm)

Dishwasher using Air Break with Drain Hose Joiner

Dishwasher using sink trap with drain hose joiner

If space is limited for fixing, push hose through drain hose support to required height.

Ensure drain hose is routed straight to joiner. Remove excess drain hose material if necessary. Do not shorten the inlet hose.
21 CONNECT INLET HOSE TO HOT WATER

Ensure the supplied rubber washer is fitted inside the coupling.

1. Ensure the supplied rubber washer is fitted inside the coupling.

2. 180°

Tighten coupling with wrench.

No leaks!

Important!
Ensure that drain connection will comply with local plumbing regulations.
**Final Checklist**

- Check all parts are installed.
- Ensure product is level, securely fastened to the cabinetry and opens and closes freely. The drawer must be free to fully close with no resistance from the cabinetry.
- Ensure inlet hose to water supply has supplied rubber washer fitted, and that it's tightened a further half turn after seal contact.
- Ensure any knockouts or plugs in drain connection have been drilled out and drain connection has been made.
- The drain hose joiner must not support the weight of excess hose material. Keep drain hose as fully extended as possible to prevent sagging. Any excess length of drain hose should be kept on the dishwasher side of the highloop.
- If connecting the drain hose to the sink trap, ensure the Highloop is a minimum 6" (150 mm) higher than the drain hose joiner.
- Ensure any packaging or tape securing the racks is removed from the drawer.
- Turn on the power and water supplies, then open the drawer. You should hear a beep and see a program indicator light up on the internal control panel.
- Check the spray arms are in place and free to rotate.

Add three cups of water into the drawer. Press \( \text{Home Check arms} \) on the internal control panel until the indicator of the ‘Rinse’ program lights up. Close the drawer and press \( \text{Start} \) to start the program.

After the Rinse program has finished, ensure the dishwasher has run and drained correctly.

Check water supply and drainage connection for leakage.

**Troubleshooting**

- Excessive water remaining above the filter plate, after the rinse cycle.
  - Check for a kinked drain hose or blocked waste connection, highloop not properly installed or drain hose not routed correctly.
- No water supply (This is displayed as a ‘U1’ fault -- see section ‘If there is a fault’ in the User guide for how to recognise this fault on models without a display.)
  - Check water is connected and turned on.
- The dishwasher is beeping continuously.
  - There is a fault. See section ‘If there is a fault’ in the User guide for further information and instructions.
- No program indicator lights up when the drawer is opened.
  - Ensure power is connected and is switched on. If it is and still no indicator lights up, see the ‘Preference options’ section of the ‘Quick start guide’. An option called ‘Open drawer auto power-on’ may need to be turned on.
- Water around water supply and drainage connections.
  - Check connections, existing plumbing and hoses for leaks. Check rubber washer and hose clamp are correctly fitted.
- If product is tipping.
  - Ensure the product is secured to the cabinetry.
- If front panels are misaligned.
  - Check and relevel product. Check the cabinetry is square. Check and adjust front panel alignment if necessary.
- Drawer doesn’t close properly.
  - Ensure nothing is obstructing the drawer from closing properly eg sound insulation, hoses or drawer latches.
- If a problem occurs, consult the ‘Troubleshooting’ or ‘Fault codes’ section of the User guide.
- If after checking these points you still need assistance, please refer to the Service & Warranty book for warranty details and your nearest Authorized Service Center, or contact us through our website, listed below.

**Important!**

SAVE THESE INSTRUCTIONS

The models shown in this document may not be available in all markets and are subject to change at any time. For current details about model and specification availability in your country, please visit our website listed at the end of this document or contact your local Fisher & Paykel dealer.
