Model available

Freezer Mode

This mode is ideal for general frozen food storage with the added flexibility of three freezer functions—bottle chill, fast freeze and deep freeze. Freezer Mode is set at 0°F for longer-term storage of frozen items.

Fridge Mode

This mode provides the ideal storage for most foods requiring normal refrigeration, such as fruit and vegetables, dairy products, processed meats and drinks. The compact upper storage tray is a perfect place for sensitive foods such as peaches, cherries, cheeses and deli items; the tall bin is ideal for large bottles and containers.

Chill Mode

Chill Mode sets the compartment to a temperature perfect for highly perishable meats, poultry and seafood. For these types of food it is ideal to store them at a temperature as close to freezing as possible to retain their vital freshness. Chill Mode sets the compartment at 31°F, just above the freezing temperature for meat.

Pantry Mode

Designed for foods that require a cool, dark place for storage, such as fruits, bread and cereal. Pantry Mode provides a solution for all those foods that you didn't previously know what to do with and have always resorted to storing on the bench or in the cupboard. This setting offers a stable storage environment at 54°F, making it ideal for sensitive foods.

Wine Mode

Using the innovative Wine Mode, connoisseurs can take advantage of special settings that preserve and present wine at its optimum temperature. This mode is ideal for long-term storage of all wine at 54°F and offers two temperature selections for short-term storage.

Handle Option

DCS CoolDrawers™ come with a choice of two handle profiles—round or square.

CoolDrawer™

**RB36S25MKIW (PANEL READY)
OPTIONAL STAINLESS STEEL
PRE-FINISHED DOOR - 23991**
