**IMPORTANT!**

**SAVE THESE INSTRUCTIONS**

The models shown in this user guide may not be available in all markets and are subject to change at any time. For current details about model and specification availability in your country, please go to our website [www.fisherpaykel.com](http://www.fisherpaykel.com) or contact your local Fisher & Paykel dealer.
SAFETY AND WARNINGS

Your dishwasher has been carefully designed to operate safely during normal dishwashing procedures. Please keep the following instructions in mind when you are using your dishwasher.

IMPORTANT SAFETY INSTRUCTIONS

WARNING! When using your dishwasher, follow basic precautions, including the following:

- Read all instructions before using the dishwasher.
- The information in this manual must be followed to minimise the risk of fire or explosion or to prevent property damage, personal injury or loss of life.
- Use the dishwasher only for its intended function as described in this user guide.
- This appliance is intended to be used in household and similar applications such as:
  - staff kitchen areas in shops, offices and other working environments;
  - farm houses;
  - by clients in hotels, motels and other residential type environments;
  - bed and breakfast type environments.
- Use only detergents or rinse aid recommended for use in a domestic dishwasher and keep them out of reach of children.
- Check that the detergent dispenser is empty after the completion of each wash program.
- When loading items to be washed, locate sharp items so that they are not likely to damage the dishwasher and load sharp knives with the handle up to reduce the risk of cut-type injuries.
- Do not touch the filter plate (the metal disc in the dishwasher base) during or immediately after use, as it may be hot from the heater plate underneath.
- Do not tamper with the controls.
- Do not abuse, sit in, stand on the door or dish rack of the dishwasher.
- Do not lean on the adjustable racks or use them to support your body weight.
- To reduce the risk of injury, do not allow children to play in or on the dishwasher.
- Under certain conditions, hydrogen gas may be produced in a hot water heater system that has not been used for two weeks or more. HYDROGEN GAS IS EXPLOSIVE. If the hot water system has not been used for such a period, before using the dishwasher, turn on all hot water taps and let the water flow from each for several minutes. This will release any accumulated hydrogen gas. As the gas is flammable, do not smoke or use an open flame during this time.
- Remove the door to the washing compartment when removing an old dishwasher from service or discarding it.
- Some dishwasher detergents are strongly alkaline. They can be extremely dangerous if swallowed. Avoid contact with the skin and eyes and keep children away from the dishwasher when the door is open. Check that the detergent receptacle is empty after completion of the wash cycle.
- Certified residential dishwashers are not intended for licensed food establishments.
- Avoid contact with the skin and eyes and keep children away from the dishwasher when the door is open. Check that the detergent receptacle is empty after completion of the wash cycle.
IMPORTANT SAFETY INSTRUCTIONS

Installation

• This dishwasher must be installed and located in accordance with the Installation instructions before it is used.
• If you did not receive Installation instructions with your dishwasher, you can order them by calling your Authorised Repairer or download them from our local Fisher & Paykel website, listed on the back cover.
• Installation and service must be performed by a qualified technician.
• If the power supply cord is damaged, it must be replaced by a dealer or Authorised Repairer or a similar qualified trades person in order to avoid a hazard.
• Ensure the dishwasher is placed between cabinetry. Failure to do so may result in an unstable product, which may cause damage or injury.
• Do not operate this appliance if it is damaged, malfunctioning, partially disassembled or has missing or broken parts, including a damaged power supply cord or plug.
• Do not store or use petrol, or other flammable vapours and liquids in the vicinity of the dishwasher.
• Connect to a properly rated, protected and sized power supply circuit to avoid electrical overload.
• Make sure that the power supply cord is located so that it will not be stepped on, tripped over or otherwise subject to damage or stress.
• Do not install or store the dishwasher where it will be exposed to temperatures below freezing or exposed to weather.
• Do not use an extension cord or a portable electrical outlet device (e.g. multi-socket outlet box) to connect the dishwasher to the power supply.
• This appliance must be earthed. In the event of a malfunction or breakdown, earthing will reduce the risk of electric shock by providing a path of least resistance for electric current.
• This appliance is equipped with a cord having an equipment-earthing conductor and a earthing plug. The plug must be plugged into an appropriate outlet that is installed and earthed in accordance with all local codes and ordinances.
• WARNING - Improper connection of the equipment-earthing conductor can result in a risk of electric shock. Check with a qualified electrician or service representative if you are in doubt as to whether the appliance is properly earthed. Do not modify the plug provided with the appliance; if it will not fit the outlet, have a proper outlet installed by a qualified technician. If the dishwasher is installed as a permanently connected appliance, please follow the earthing instructions:
• EARTHING INSTRUCTIONS - This appliance must be connected to a earthed metal, permanent wiring system, or an equipment-earthing conductor must be run with the circuit conductors and connected to the equipment-earthing terminal or lead on the appliance.
SAFETY AND WARNINGS

IMPORTANT SAFETY INSTRUCTIONS

Maintenance

- Disconnect the appliance from the power supply before any cleaning or maintenance.
- When disconnecting the appliance pull the plug rather than the power supply cord or junction of cord to avoid damage.
- Do not repair or replace any part of the appliance or attempt any servicing unless specifically recommended in this user guide.
- We recommend that you contact Customer Care to arrange service. See your ‘Service and warranty’ booklet for contact details.
- Keep the floor around your appliance clean and dry to reduce the possibility of slipping.
- Keep the area around/underneath your appliance free from the accumulation of combustible materials, such as lint, paper, rags and chemicals.

Operational

- Open the door very carefully if the dishwasher is in operation. There is a risk of being sprayed with hot water. Do not open the door fully until the spray arms have stopped rotating.
- Always press the button to pause and wait a few seconds before opening the door.
- The door should not be left in the open position as this could present a tripping hazard.
- The water inside the dishwasher is not suitable for drinking.
- The dishwasher must be used with the filter plate, drain filter and spray arm(s) in place. To identify what these parts are, see drawings in section ‘Care and Cleaning' of this user guide.
- Do not operate this dishwasher if it is damaged, malfunctioning, partially disassembled or has missing or broken parts, including a damaged power supply cord or plug.
- Household appliances are not intended to be played with by children. Children of less than 8 years old must be kept away from the appliance unless continuously supervised. This appliance can be used by children aged from 8 years and above, and persons with reduced physical, sensory or mental capabilities or lack of experience and knowledge, if they have been given supervision or instruction concerning the use of the appliance in a safe way and they understand the hazards involved.
- Cleaning and user maintenance shall not be done by children without supervision.
- Do not allow children to play inside, on or with this appliance or any discarded appliance.
- If a dishwasher cleaner is used, we would strongly recommend a wash program with detergent should be run immediately afterward, to prevent any damage to the dishwasher.
- The dishwasher is designed for washing normal household utensils. Items that are contaminated by petrol, paint, steel or iron debris, corrosive, acidic or alkaline chemicals are not to be washed in the dishwasher.
- If the dishwasher is not being used for long periods of time, turn the electricity and water supply to the dishwasher off.
Before you start

Safety and compliance

- These instructions are intended as a guide only. It is the responsibility of the installer to ensure that installation complies with applicable regulations and local government by-laws.
- Installation must be performed by a suitably qualified person. Incorrect installation or malfunctioning resulting from incorrect installation are not covered by warranty.
- Carefully read through the ‘Safety and warnings’ section of this document.
- The dishwasher must not be connected to the electrical supply while it is being installed. Ensure all domestic wiring is properly earthed.
- If an old appliance is being replaced, make sure it is disposed of properly. To avoid children getting trapped or injured while playing with an old appliance, ensure you remove any doors, door locks and cables from it.
- In order to ensure that the dishwasher is stable, it must be installed under a continuous surface which is attached to adjacent cupboards.

Unpacking and handling

- Check packaging and dishwasher for signs of transport damage. If the dishwasher is in any way damaged, do not install it. Contact the dealer the dishwasher was purchased from.
- Disposal of packaging: some of the packaging is recyclable. Check the symbols and labels and recycle if possible.
- Never lift the dishwasher from the door handle or the top panel. Doing so may cause damage.
- Always be careful with the hoses and power cord at the back of the dishwasher. Careful handling will prevent damage and malfunction from squashing, kinking or cuts.
- While installing the dishwasher, check the drain hose is not restricted or kinked.

Connections and services

- Check that the power cord is long enough to reach the outlet. If it isn’t, it must be replaced by a Fisher & Paykel authorised technician. Extension cords or multi-outlet power boards should not be used to connect the dishwasher to the power supply.
- Check that the hoses are long enough to reach the services. If a hose needs extending, ensure that the extension hose is new and of equal quality and diameter to the one already fitted. Note: the drain hose should not be longer than 4 m, as a longer drain hose will cause reduced performance.
- The dishwasher should not be connected to a water system where the temperature exceeds 60°C, or where there is no temperature control, e.g. wetback system, unless the system is fitted with a suitable tempering valve.
- The dishwasher must not be connected to an undersink high-pressure “push-through” type hot water system, as damage to the system will result.
Technical data

Check the electrical data on the rating label (located on the left-hand side of the dishwasher’s stainless steel inner door). Should the data on the rating label be different to those specified below, consider those on the rating label as correct.

</tbody>
</table>

* The top panel may be removed to suit underbench cavity height. See instructions further below.
**Depending on feet height adjustment.
Preparing the product and cabinetry

- The top panel may be removed to suit underbench cavity height. See the illustrations below.

**IMPORTANT!**
To prevent possible steam damage to the cabinetry, ensure that any bare wood surrounding the dishwasher is sealed with an oil-based paint or moisture-proof polyurethane.

- Services can be located either side of the dishwasher.
- Ensure that the services hole has a minimum diameter of 50 mm.
Levelling and positioning the dishwasher

- Before sliding the dishwasher into position, adjust the feet with a spanner (1) to ensure that the dishwasher is level (2) and the required height.
- Do not lift the dishwasher from the door handle or top panel.
- Position the dishwasher in the cavity, ensuring that the hoses and power cord don’t get bent, crimped, or trapped under the dishwasher in the process (3).
- We recommend that you adjust the feet so that the dishwasher sits securely under the bench top so that it doesn’t tip.
Plumbing -- Waste connection

These drainage options are designed to eliminate problems that occur with combined sink-dishwasher waste systems.

Drainage option A: Separate sink and dishwasher waste systems

- The standpipe must have a minimum diameter of 38 mm and stand 750 mm above the floor.
- Use the supplied drain hose support to hold the drain hose in place in the standpipe.

**IMPORTANT!**
We do not recommend connecting the drain hose or drain pipe directly to a built-in waste disposal unit.

Drainage option B: Combined sink and dishwasher waste systems

- When connecting the drain hose to a sink trap with a drain hose spigot, make sure that the drain hose is supported to the height of the bench.
- Ensure the drain spigot has a minimum hole diameter of 15 mm and it has been drilled out.
Plumbing -- Water inlet connection

**IMPORTANT!**
- The appliance should be connected to the water main using the new water inlet hose supplied. Old hoses should not be used.
- Do not shorten the inlet hose.

1. Take note of water connection requirements.
   - The dishwasher has a single valve water connection.
   - We recommend a cold water connection for best performance and energy efficiency.
   - The incoming water temperature should not exceed 25°C.
2. Take note of the permitted water pressure extremes.
   - Lowest: 0.3 bar = 3 N/cm² = 30kPa
   - Where pressure is below 1 bar, contact a qualified plumber.
   - Highest: 10 bar = 100 N/cm² = 1MPa
   - Where pressure is above 10 bar, a pressure reduction valve must be installed. Contact a qualified plumber.
3. Connect the water inlet hose to an accessible water tap with a 3/4” BSP connector. Ensure that there is no kink in the inlet hose that could restrict the flow of water. A 90° bend requires a minimum height of 200 mm for a kink-free curve.
   - Ensure incoming water is clear. If the water pipes have not been used for a long period of time, let the water run to make sure it is clear with no impurities. Not doing so may result in the water inlet hose getting blocked and damaging the appliance.
   - If required, use a filter insert to filter out deposits from the piping. The filter insert is available from your Authorised Service Centre or Customer Care.
4. Tighten the hose coupling a further half turn after seal contact.
5. Check that the connection does not leak.

\[\text{min.} \quad 10 \text{ mm}\]

3/4” BSP connector
INSTALLATION INSTRUCTIONS

Electrical connection

- The dishwasher must not be connected to the electrical supply while installation is being carried out. Ensure all domestic wiring is properly earthed.
- Check the rating label (located on the left-hand side of the dishwasher’s stainless steel inner door) and ensure that the voltage and frequency values for the current in the house correspond to those on the rating label.
- Insert the plug into a properly earthed power outlet that has a disconnection switch.

IMPORTANT!

- The earthing of the appliance is a safety requirement mandated by law.
- If the power cord is not long enough to reach the outlet or the outlet to which the appliance must be connected is not appropriate for the plug, the entire dishwasher power cord must be replaced. This should only be done by a Fisher & Paykel authorised technician. Do not modify or cut the plug. Do not use an adaptor, extension cord, or multi-outlet power board to connect the dishwasher to the power supply, as these could cause overheating and create a fire hazard.
- The outlet into which the dishwasher is plugged must remain easily accessible (e.g. in an adjacent cabinet) even when the appliance is installed. This is to ensure that the dishwasher can be disconnected from the power supply for safe cleaning and maintenance.

Installer final checklist

- Check that the door opens and closes freely without resistance to adjacent cabinetry.
- Check that the plug is accessible.
- Check that the dishwasher is level. If necessary, adjust the levelling feet slightly. To ensure optimum performance, the dishwasher should not be inclined more than 1°. Check with a spirit level.
- Check the operation of the dishwasher:
  1. Press \(\) to turn the dishwasher on.
  2. Select the Rinse programme. Press \(\) until Rinse is selected.
  3. Press \(\) to start the Rinse programme. Can you hear the dishwasher filling?
  4. When the Rinse programme is over (approx. 20 minutes), check that the water has drained.

If a fault code appears, see the ‘Fault codes’ section of the User guide for advice.
Before you start

- Make sure the installer has completed the ‘Final checklist’ in the Installation instructions.
- Read this guide, taking special note of the ‘Safety and warnings’ section.
- Remove all packaging and check you have the accessories listed below.
Starting a wash

1. Remove food scraps and load dishes carefully
   For more detail, see sections ‘Caring for your dinnerware’ ‘Loading’

2. Add detergent
   For more detail, see sections ‘Water hardness and dishwashing’ ‘Wash programmes and detergent quantities’ ‘Adding detergent’

3. Turn power on (also check water is turned on)
   For more detail, see section ‘Controls and starting a wash’

4. Check rinse aid level, refill if necessary
   For more detail, see section ‘Using rinse aid’

5. Check that nothing obstructs the spray arms, then close the door firmly

6. Select wash programme
   For more detail, see section ‘Controls and starting a wash’ ‘Wash programmes and detergent quantities’

7. Start wash OR set Delay start
   For more detail, see section ‘Controls and starting a wash’ ‘Setting Delay start’

After the wash

8. Open the door slightly and leave ajar to help drying
   For more detail, see section ‘After the wash’

9. Once cooled, unload dishes carefully
   For more detail, see section ‘After the wash’

10. Check condition of dishwasher, clean if necessary
## CONTROLS AND STARTING A WASH

<table>
<thead>
<tr>
<th>Control panel feature</th>
<th>ACTION TO TAKE</th>

</tr>
<tr>
<td><strong>Keylock indicator</strong></td>
<td>This will light up when the control panel is locked.</td>
</tr>
<tr>
<td></td>
<td>The indicator will flash if any button is pressed while the control panel is locked.</td>
</tr>
<tr>
<td><strong>Rinse aid indicator</strong></td>
<td>This will light up when the rinse aid level is low.</td>
</tr>
<tr>
<td></td>
<td>When the indicator lights up, refill rinse aid. See ‘Using rinse aid’ for instructions.</td>
</tr>
</tbody>
</table>
To select and start a wash programme

1. Press \( \textcircled{1} \) to turn the dishwasher on. The display will flash.
2. Press \( \textcircled{2} \) until the indicator of the desired programme lights up.
3. Press \( \textcircled{3} \) to start the programme.
   - The display will stop flashing and the dishwasher will start.
   - The display will show the approximate time remaining.
   - Note: the dishwasher will remember the last programme used.

To pause and restart a wash programme

1. Press \( \textcircled{1} \) to pause the programme. The display will flash.
2. Open the door very slowly.

**IMPORTANT!**
There is a risk of being sprayed with hot water. Do not fully open the door until the spray arms have stopped rotating.

3. Load, remove, or rearrange any dishes if needed
4. Press \( \textcircled{4} \) to restart the programme.

<table>
<thead>
<tr>
<th>WASH PROGRAMME</th>
<th>DESCRIPTION</th>
</tr>
</thead>
<tbody>
<tr>
<td>Auto</td>
<td>Senses the optimal wash programme for your dishes.</td>
</tr>
<tr>
<td>Heavy</td>
<td>A wash for heavily soiled dishes.</td>
</tr>
<tr>
<td>Medium</td>
<td>Dishes that are quite heavily soiled or food soils that have been left to dry overnight.</td>
</tr>
<tr>
<td>Eco</td>
<td>Dishes with normal soils for optimum energy and water usage.</td>
</tr>
<tr>
<td>Fast</td>
<td>A fast wash for lightly soiled dishes.</td>
</tr>
<tr>
<td>Rinse</td>
<td>Prevents food from drying on dishes.</td>
</tr>
</tbody>
</table>

To cancel a wash programme once it has started

1. Press \( \textcircled{1} \) to pause the programme.
2. Press \( \textcircled{2} \) to turn the dishwasher off.
   The programme has now been cancelled. If you wish, you can start a different one.
   Note: you may need to refill the detergent dispenser.
**SETTING A DELAYED START**

**Delay start**

This feature can delay the start of a wash programme from 1 to 12 hours.

**To activate Delay start:**

1. Load the dishes, add detergent and close the door.
2. Press ① to turn the dishwasher on.
3. Select the wash programme.
4. Press Delay. The display will change to 1h (the  h will flash). Press the button again until the display shows the required delay (each press increases the delay by 1 hour up to 12 hours).
5. Press ② to begin the Delay start.

The  h will stop flashing. The display will show the countdown in hours. The wash programme will automatically start when the delay time is over.

To cancel Delay start, press ①.

**Keylock**

This feature disables all the buttons on the dishwasher.

To activate Keylock, press and hold ① until the Keylock indicator will light up to indicate that Keylock has been activated.

The display will remain on (if no programme has been started it will continue to flash while the control panel is locked).

To cancel Keylock, press and hold ① until the Keylock indicator goes out to indicate that Keylock has been cancelled.

If any other buttons are pressed while Keylock is activated, the the Keylock indicator will flash for a few seconds.
USER PREFERENCE SETTINGS

These allow you to:
• Adjust the Rinse aid level.
• Turn the Beeps on or off.

To adjust the Rinse Aid level

1 Press \(\text{1}\) to turn the dishwasher on.
2 To enter the User preference settings, press and hold Delay and \(\rightarrow\) together until:
   • The display shows the current Rinse Aid setting (the default is \(rA6\)).
   • The Auto indicator will flash and the Heavy indicator will be steadily lit.
3 Press Delay to change the Rinse Aid setting in steps between \(rA1\) (minimum dispense) and \(rA7\) (maximum dispense).
4 To exit the Rinse Aid menu, press \(\text{1}\).

To turn the Beeps on or off

1 Make sure the dishwasher is on.
2 To enter the User preference settings, press and hold Delay and \(\rightarrow\) together until:
   • The display shows the current Rinse Aid setting.
3 Press \(\rightarrow\) to scroll to the Beeps menu.
   • The display will show \(bPO\) (Beeps off) or \(bP1\) (Beeps on).
   • The Heavy indicator will flash and the Auto indicator will be steadily lit.
4 Press Delay to toggle between Beeps off \((bPO)\) and Beeps on \((bP1)\)
5 Press \(\text{1}\) to select the setting and return to the programme display.
The combination of high temperatures and dishwasher detergent may cause damage to some items if they are washed in the dishwasher. Remember, if in any doubt about any aspect concerning items washed in the dishwasher, follow the instructions from the manufacturer of the items, or wash the item by hand.

**IMPORTANT!**

Never put highly absorbent materials, such as sponges and towels in your dishwasher. Do not put dishes or cutlery that have been soiled by tobacco ash, wax, lubricating grease or paint in your dishwasher.

**Cutlery and silverware**

All cutlery and silverware should be rinsed immediately after use to prevent tarnishing caused by some foods. Silver items should not come into contact with stainless steel, e.g. other cutlery. Mixing these items can cause staining. Remove silver cutlery from the dishwasher and hand dry immediately after the programme has finished.

**Aluminium**

Aluminium can be dulled by dishwasher detergent. The degree of change depends on the quality of the item.

**Other metals**

Iron and cast iron objects can rust and stain other items. Copper, pewter and brass tend to stain. Wash these items by hand.

**Woodware**

Wooden items are generally sensitive to heat and water. Regular use in the dishwasher may cause deterioration over time. If in doubt, wash by hand.

**Glassware**

Most everyday glassware is dishwasher safe. Crystal, very fine and antique glassware may etch that is, become opaque. You may prefer to wash these items by hand.

**Plastic**

Some plastic may change shape or colour with hot water. Check the manufacturer’s instructions about washing plastic items. Washable plastic items should be weighted down so they do not flip over and fill with water or fall through the basket during the wash.

**Decorated items**

Most modern china patterns are dishwasher safe. Antique items, those with a pattern painted over the glaze, gold rims or hand-painted china may be more sensitive to machine washing. If in doubt, wash by hand.

**Glued items**

Certain adhesives are softened or dissolved in machine washing. If in doubt, wash by hand.
<table>
<thead>
<tr>
<th>DOs</th>
<th>DON'Ts</th>
</tr>
</thead>
<tbody>
<tr>
<td>● Arrange the dishes neatly, spacing them evenly for maximum exposure to water.</td>
<td>• Don't overcrowd the dishwasher. This will reduce performance.</td>
</tr>
<tr>
<td>● Remove any large food particles before placing dishes in the dishwasher. This is to prevent the filters from becoming clogged.</td>
<td>• Don't allow plates and cutlery to nest.</td>
</tr>
<tr>
<td>● Pre-soak any pots and pans with baked-on residue. This will eliminate the need for extra wash cycles.</td>
<td>• Don't let dishware block water from reaching items on the cup racks.</td>
</tr>
<tr>
<td>● Always check that water can reach all areas, particularly the cup racks.</td>
<td></td>
</tr>
<tr>
<td>● Make sure all items are stable and cannot move during the wash. Any flimsy or light plastic items should be either weighted down or placed in the utensil tray.</td>
<td></td>
</tr>
<tr>
<td>● Ensure there are no dishware items that will stop the spray arm from rotating.</td>
<td></td>
</tr>
</tbody>
</table>
Upper basket

- The upper basket is designed to hold items like glasses, cups, saucers, plates, small bowls and shallow pans.
- You can adjust the height of the upper basket to create more space for tall items in the lower basket. See below.
- Place small items on the foldable cup holder.

**IMPORTANT!**
Place sharp and pointed items with the blade pointing downward into the knife rack, to keep them out of harms way.

Adjusting the height of the upper basket

**IMPORTANT!**
Before you adjust its height, make sure the basket is empty.

1. Turn the front safety stops on either side outwards.
2. Slide the empty basket out of the runners.
3. Reinsert the higher or lower set of rollers in the runners and slide the basket all the way back in.
4. Turn the front safety stops inwards.
**LOADING**

**Lower basket**

- Place the largest items here: pots, pans, lids, serving dishes and bowls.
- Fold down the tines to place pots and pans flat on the bottom.
- Ensure dishware items do not block the spray arm above from rotating.
- If you need more height for tall items, you can raise the upper basket. See instructions on previous pages.

**Cutlery basket**

- To reduce the risk of injury, we recommend loading knives and sharp utensils with handles facing up.
- Mix spoons, knives and forks within each section to stop cutlery nesting together and to ensure the water circulates freely. Alternatively, use the clip-on anti-nesting grids to keep cutlery items apart.
- Keep stainless steel from touching silver cutlery to avoid staining.
- You can halve the cutlery basket as shown and use just one section. This is useful if the cutlery load is light or if you want to make more space for other dishes.
What is water hardness?

Hard water is water with a high concentration of minerals such as calcium and magnesium. In soft water, this concentration is low. Water hardness varies by geographical location.

How does water hardness affect dishwashing?

- Hard water can be detrimental to the performance of your dishwasher. Over time, glassware washed in hard water will become opaque and dishes will become spotted or covered in a white film. Using very hard water can cause dishwasher parts to fail over time.
- Naturally soft or softened water has no detrimental effects if used with the correct amount of detergent. However, excess detergent combined with hot, soft water may cause irreversible etching on glassware. Etching first appears as a rainbow-coloured film and—if allowed to continue—can make glassware permanently opaque.

What can I do to minimise any detrimental effects?

Contact your local water company to find out about water hardness in your area.

If your home has hard water ...

- Increase the amount of detergent used.
- Use a detergent with high phosphate content. Phosphate softens the water and this improves wash results. You could also try using multi-purpose tablets.
- Use rinse aid. We recommend you turn the rinse aid on and to at least setting 5 to help improve wash performance.
- Use a dishwasher cleaner/descaler regularly, or whenever you notice a build-up of limescale deposits in your dishwasher.

IMPORTANT!
We recommend fitting a water softener to the household water supply. If the water hardness in your home is above 250 ppm/14.6 gpg, a water softener has to be fitted to maintain the performance of your dishwasher.

If your home has naturally soft or softened water...

- Avoid using too much detergent. Follow the quantity recommendations on the following page.
- Ensure the dishwasher is not overloaded and water can reach all the dishes.
### Wash Programmes and Detergent Quantities

- The quantities in the table below are for powdered detergent and typical levels of soiling. If your home has softer or harder water, or to suit the particular load, you may need to adjust these quantities.
- If you are using tablets, follow the tablet manufacturer’s recommendations.
- The indicator light will show which option has been selected.

</table>
**IMPORTANT!**
- Only use detergents recommended for automatic dishwashers.
- Dishwasher detergents are strongly alkaline. They can be extremely dangerous if swallowed. Avoid contact with the skin and eyes and keep children and infirm persons away from the dishwasher when it is open. Check that the detergent dispenser is empty after completion of each wash programme.
- Never sprinkle or pour detergent directly onto any item in the dishwasher. Detergent and dishwasher tablets should not be in direct contact with dishes or cutlery.
- Do not use hand washing liquids, soap, laundry detergents or disinfectants, as these will damage the dishwasher.

**Filling the detergent dispenser**

1. Press the button on the right of the dispenser.

2. **IMPORTANT!**
   *Approach the dispenser from the right-hand side to prevent the cover from snapping open on your hand.*

3. Add detergent into the appropriate compartment(s). If you are using powdered detergent, see the recommended quantities on the previous page. The ‘20’ and ‘30’ markings in the main wash compartment correspond to grams of powdered detergent.

4. **IMPORTANT!**
   *Tablets should only be placed in the main wash (larger) compartment.*

5. Remove any excess detergent from the edges of the dispenser.

6. Close the cover and press down until it clicks shut. The detergent will automatically be released into the dishwasher during the wash programme.
USING RINSE AID

We highly recommend using liquid rinse aid regularly to get the best drying results. Rinse aid gives a streak-free, sparkling clean look to glass and chinaware. In addition, it prevents metal from tarnishing.

**When to refill the rinse aid dispenser**

When rinse aid level becomes low, the rinse aid indicators on the control panel will light up to remind you to refill the dispenser.

**Adjusting the rinse aid dosage**

The normal, factory-set dosage level is 5 for, but you may need to adjust this to suit your water conditions.

- If there is excessive foaming at the end of the wash, reduce the dosage.
- If you live in a hard water area or if dishes are wet or streaky after drying, increase the dosage.
- To adjust the rinse aid setting: see 'User preference settings' for how to do this.
- If you are using tablets with built-in rinse aid, we recommend setting the rinse aid dosage level to 2.

**How to refill the rinse aid dispenser**

1. Press the button to snap the dispenser cover open.
2. Pour rinse aid into the circular opening, making sure not to fill beyond the MAX marking.

**IMPORTANT!**

*Take care not to spill rinse aid into the dishwasher.*

*Any spills must be wiped up to prevent excess foaming. Failure to do so may result in a service call, which will not be covered by warranty.*

3. Close the cover, making sure it clicks shut.
AFTER THE WASH

When the wash programme is over, the dishwasher will beep six times, then automatically turn off in a few seconds.

1. Open the door slightly and leave it ajar (about 100 mm) to help the drying process.
2. Once the dishes are cool to touch, they can be removed.

**IMPORTANT!**

Never leave the dishwasher door in the fully open position, as this could present a tripping hazard.

3. Check that the detergent dispenser is completely empty. If it isn’t, wipe out with a damp cloth.
4. Inspect your dishwasher regularly to see if it needs any cleaning or maintenance:
   - Check that no grease or limescale deposits have accumulated on the inside.
   - If there are food particles in the filters, these need to be cleaned as well.
   - See section ‘Care and cleaning’ for cleaning and maintenance instructions.

**Holiday time**

If the dishwasher is not going to be used for some time:

- Ensure the baskets are empty.
- Leave the inside of the dishwasher clean.
- Leave the dishwasher door ajar to allow air to circulate.
- Turn off both the power and water supply to the dishwasher.
Over time, food residue or limescale deposits may accumulate inside your dishwasher. These may reduce efficiency, and food residue may produce a bad odour. Inspect and clean your dishwasher regularly.

**IMPORTANT !**

- Before any cleaning or maintenance, always disconnect the dishwasher from the power supply, turn off the water supply, and wait until all parts of the dishwasher have cooled.
- Do not use the following cleaning aids, as they may damage the surfaces:
  - plastic or stainless steel scouring pads
  - abrasive, solvent, household cleaners
  - acid or alkaline cleaners
  - laundry detergents or disinfectants
  - stainless steel cleaners or polishes
  - hand-washing liquids or soap
- Where there is broken crockery or glass in the dishwasher, it must be carefully removed to prevent personal injury or damage to the appliance.
- After cleaning, always check that the spray arms and filters are all correctly in place.

**Cleaning the dishwasher exterior**

Wipe with a clean, soft damp cloth and dry with a clean, lint-free cloth.

Note: before cleaning the control panel, it is useful to disable the buttons by activating Keylock.

**Cleaning the door seal and dishwasher interior**

Clean thoroughly with warm water on a soft, lint-free cloth. If the interior is heavily soiled, use a dishwasher cleaner/descaler following the manufacturer’s instructions.
CARE AND CLEANING

Cleaning the filters

The filters prevent larger food particles in the wash water from reaching the pump. These particles may occasionally block the filters. We recommend cleaning the filters whenever there is evidence of food particles.

- To remove the drain filter, turn the filter anti-clockwise to release, then lift out.
- Once the drain filter has been removed you can lift the filter plate out.
- Rinse them thoroughly under running water and then replace.

**IMPORTANT !**
When cleaning the underside of the filter plate, take care handling its sharp outer edge.

- Replace the filters correctly after cleaning, making sure the filter plate is flush with the dishwasher base.

Cleaning the spray arms

Limescale and food particles in the wash water can block the holes in the spray arms and the arm mountings. Clean these parts about once a month, or more often should the need arise.

- To remove the upper spray arm, unscrew its locking nut.
- To remove the lower spray arm, simply lift the spray arm off its mounting.
- Rinse the spray arms thoroughly under running water, then refit them on their mountings. Make sure you twist the locking nut on the upper spray arm firmly back on.
If the dishwasher malfunctions, it will display a fault code and beep. Check the following table below to see if you can correct the fault yourself.

**If the dishwasher still will not work, or shows any other fault code**

1. Press 1 to turn the dishwasher off and wait a few minutes.
2. Press 2 again to turn the dishwasher back on.

If the dishwasher still does not function and/or the problem persists, disconnect the dishwasher from the power supply, turn the water supply off, then contact Fisher & Paykel Customer Care with the fault code information.

Before you call for service or assistance ...

Check the things you can do yourself. Refer to the installation instructions and your user guide and check that:

① Your product is correctly installed.
② You are familiar with its normal operation.

If after checking these points you still need assistance or parts, please refer to the Service & Warranty book for warranty details and your nearest Authorised Service Centre, Customer Care, or contact us through our website www.fisherpaykel.com.

Complete and keep for safe reference:
