Dear Owner: Thank you for purchasing our cooktop which is designed to give you many years of cooking pleasure. Before using your new appliance please read the user's manual carefully and keep it in a safe place for future reference.

This appliance must be installed only by a qualified person in accordance with the installation instructions and safety features of the products themselves. The manufacturer declines all responsibility for improper installation, which may harm persons and animals or cause damage to property. The appliance must be used only for the purpose for which it was expressly designed. Any other use (e.g., heating rooms) is considered to be improper and manufacturer declines all responsibility for damage resulting from improper and irresponsible use.

Important notice:
Register your warranty card. Return the enclosed certificate of guarantee, duly dated and signed. A duplicate data label and wiring diagram are contained in this booklet. Please attach these labels to an accessible and near by surface for easy reference. The manufacturer shall not be held responsible for any inaccuracies in this handbook due to printing or transcription errors. Also, the designs in the figures are purely indicative. The manufacturer also reserves the right to make any modifications to the products as may be considered necessary or useful also in the interests of the user, without jeopardizing the main functional and safety features of the products themselves.

WARNING: Unattended cooking on a hob with fat or oil can be dangerous and may result in a fire.

Use:
Directions and suggestions for using:
1. Do not touch the built-in ceramic hob with wet hands or feet.
2. Do not operate the built-in electric hob when you are barefoot.
3. Do not let young children operate the built-in ceramic hob.
4. Please disconnect the power supply before you do any maintenance and cleaning.
5. When the built-in ceramic hob is working, the temperature of the electric hob and the ambiance become higher, so please do not touch it and keep the children away from it.
6. A steam cleaner must not be used for cleaning the appliance.
7. If the power cord is damaged, it must be replaced by the manufacturer, its service agent or similarly qualified persons in order to avoid a hazard.
8. The appliance is not intended for use by persons (including children) with reduced physical, sensory or mental capabilities, or lack of experience and knowledge.
9. Children should be supervised to ensure that they do not play with the appliance.
10. Do not stare at the hob elements when the appliance is working.
11. CAUTION: The surface temperature exceeds 95°C. Be restricted. Refer to the installation instructions.

DUAL COOKING ZONE
Open the DUAL COOKING ZONE, the inner ring is working, press the DUAL COOKING button (fig. 6), the outer ring is working.

Timer:
Your hob has a timer which you can set (from 1 to 99 minutes) for each cooking zone. At the end of the countdown period, a buzzer will sound and the relevant cooking zone will be switched off.

CAUTION: The cooking process has to be supervised. Short term cooking process has to be supervised continuously.

Utensils:
Use pans with flat bottoms. Uneven or thin bottoms will waste energy and are slow to cook.
Use pans slightly larger than the hotplates. Smaller pans will waste energy.
Do not use oversized pans. More than 5mm overhang can overheat cooktop components and can cause fine cracks in the enamel hob which will trap dirt.
Use only dry utensils. Do not place wet or steamy pans (eg. lids) on the hotplates.

Do not use potts and pans that are unsteady and likely to rock or overbalance.
Do not operate the cooktop for an extended time without utensil on the hotplace.

IMPORTANT: The residual heat indicator will disappear if the mains supply to the product is cut.

Locking the ceramic hob:
To lock the ceramic hob, press the safety lock button (fig. 4) while the appliance is switched on.

With the safety lock activated, all buttons on the control panel will be disabled, except the ON/OFF button. To disable the safety lock feature, press the safety lock button again. And you are then able to adjust the heat level of any zone on the hob.
Cleaning
Turn off the mains to the equipment before carrying out any maintenance and wait for it to cool down. We advise using lukewarm water and detergents to clean enamelled elements. Never use abrasive products. Rinse the glass worktop with water and dry using a soft cloth. Use sponges or a moist cloth to clean the tops, and remember that water in excess can damage the electrical elements. Clean tough stains using non-abrasive detergents, or warm vinegar.
Clean the electric tops using a moist cloth, then lightly oil the top when it is still warm. Only licensed repairers should service the appliance.

Installation
Electrical connection. Appliances with three-pole cable are set up for operation with alternating current at the voltage and frequency indicated on the rating plate. Look at the connection wiring diagram. The earth conductor is yellow/green. The connection to the electricity supply must be made by a qualified person and following the regulations in force. When the appliance is to be installed above a built-in oven, the two appliances must be connected separately, to make it easier to take the appliances out and for electrical safety.

MALFUNCTION ELIMINATION

<table>
<thead>
<tr>

</table>
| Hob doesn’t work | - Check the connection of wires  
- Check the fuse and the current limit |
| There is some smoke when it is working | - It is normal the first time you use.  
- Clean the dral around the electric hob and the heating area. |
| The wire is damaged | - Connect the nearest maintenance center to change the equipment parts. |

The manufacturer refuses all responsibility if the standards in force are not respected. TECHNICAL INFORMATION FOR INSTALLATION PERSONNEL:

This appliance must be installed only by authorised personnel and in accordance with the regulations of Electricity authorities. The wall and bench surfaces must be capable of sustaining temperatures of 95 degrees Celsius. All terminales, fixing adhesive and surrounding materials should be certified suitable for this temperature. Do not install it in the unirestisent place (like curtain etc). When you operate, the manufacturer has no responsibility.

According to the picture as follows, cut the square hole in bench and place the built-in electric hob in it. Your hob can be fitted to any worktop with a thickness of 40 to 50 mm.

WARNING
Close the cable clamp after making the electrical connection. Close the terminal board cover by twisting it down.

Secure the hob to the underside of the worktop using the fixings provided. Screw one end of the bracket into the pre-drilled holes in the underside of the hob. The other end of the bracket should be located underneath the worktop to secure the hob in position.

Note 1: Fire resistant material (eg ceramic tiles) is required to 450mm above burner tops if wall or vertical structures are not permitted within 200 mm from burner.
Note 2: No overhanging surface or rangehood and exhaust system are not permitted within 750 mm above burner tops.
Note 3: Leave at least 50 mm clearance between the base of the appliance and combustible surfaces. Never leave the packing components (plastic bags, nails, foam polystyrene, etc.) within the reach of the children since they are a source of potential danger.

The hob has a special seal which prevents liquid from entering the cabinet. Follow these instructions in order to correctly apply this seal:
- Detach the seals from their backing, that the transparent protection still adheres to the seal itself. Turn over the hob and correctly position seal under the edge of the hob itself, so that the outer part of the seal itself perfectly matches the outer edge of the hob. Evenly and securely fix the seal to the hob, pressing it firmly in place.

CLEANING AND MAINTENANCE
- Do not use cleaning products containing abrasive materials for the cleaning and maintenance of the glass front panel.
- When cleaning do not use cleaning agents with a strong abrasive effect, such as e.g. scouring powders containing an abrasive, abrasive compounds, abrasive stones, pumice stones, wire brushes and so on. They may scratch the hob surface, causing irreparable damage.
- Large stains that are firmly stuck to the hob can be removed by a specialist scraper, but be careful not to damage the ceramic hob frame when doing this.

Caution!
The sharp blade should always be protected by adjusting the cover (just push it with you thumb). Injuries are possible so be careful when using this instrument keep out of reach of children.

Appropriate light cleaning or washing products are recommended, such as e.g. any kind of liquids emulsions for fat removal. Alternatively a solution of warm water with a little washing up liquid or cleaning products for stainless steel sinks can be used.

WARMING

The voltage rating of the hob heating elements is 220-240V. Appliances with three-pole cable are set up for operation with alternating current at the voltage and frequency indicated on the rating plate. Look at the connection wiring diagram. The earth conductor is yellow/green. The connection to the electricity supply must be made by a qualified person and following the regulations in force. When the appliance is to be installed above a built-in oven, the two appliances must be connected separately, to make it easier to take the appliances out and for electrical safety.
