**Safety Warnings**

Your safety is important to us. Please read this information before using your cooktop.

**Electrical Shock Hazard**
- Disconnect the appliance from the mains electricity supply before carrying out any work or maintenance on it.
- Connection to a good earth wiring system is essential and mandatory.
- Alterations to the domestic wiring system must only be made by a qualified electrician.

**Touch Hazard**
- Make sure the controls are always clean, dry, and that there is no object (e.g. a utensil or a cloth) placed on them.

**General**
- You will hear a beep each time a touch is registered.
- Use the ball of your finger, not its tip.
- Read this guide, taking special note of the ‘Safety Warnings’ section.

**Operation and maintenance**

**Touch the ON/OFF control.**

**Safety benefits**
- The display will automatically turn off after 1 minutes if no suitable pan is placed on it.
- If the display flashes "Lo" alternately with the heat setting, this means that you have not placed a pan on the correct cooking zone.
- The cooking process has to be supervised. A short term cooking process has to be supervised continuously.
- Unattended cooking on a hob with fat or oil can be dangerous and may result in fire. Never try to extinguish a fire by water, but switch off the appliance.
- Make sure the pan you're using is not suitable for induction cooking or, the pan is too small or not properly centred on the cooking zone.
- Heated cooking zone and its hot plate may be hot. To keep your hands safe, use the hotplate that is still hot.
- If you change the heat setting after 1 minute, the induction hob will automatically switch off. You will need to start again at step 2.
- Modifying the heat setting at any time during cooking.
- The display will automatically turn off after 1 minute if no suitable pan is placed on it.

**CAUTION:**

- Unattended cooking on a hob with fat or oil can be dangerous and may result in fire.
