WARNING! – When using your refrigerator, follow basic precautions, including the following:

- Read all instructions before using the refrigerator.

Danger

- This appliance is not intended for use by persons (including children under the age of 8) with reduced physical, sensory or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction concerning use of the appliance and the hazards involved by a person responsible for their safety.

- Cleaning and user maintenance shall not be made by children without supervision.

- Young children should be supervised to ensure they do not play with the appliance.

- Risk of child entrapment. Before you throw away your old refrigerator:
  - Take off the doors
  - Leave the shelves in place so that children may not easily climb inside.

- The manufacturer’s installation instructions for your refrigerator and cabinetry ventilation must be followed when installing the appliance.

- Keep ventilation openings, in the appliance enclosure or in the built-in structure, clear of obstruction.

- Do not use mechanical devices or other means to accelerate the defrosting process, other than those recommended by the manufacturer.

- Do not damage the refrigerant circuit.

- DO NOT continuously dispense water for longer than 2 minutes.

- DO NOT use copper tubing. The plastic tubing supplied should always be used.

- DO NOT screw filter to fridge.

- DO NOT mount filter in such a position so that it will be struck by other items, such as wastebaskets, etc.

- DO NOT install the filter or any water tubing in direct sunlight as prolonged exposure to light can weaken plastic components.

- DO NOT install in a location that is susceptible to freezing temperatures as damage to the housing could occur.

- DO NOT screw filter to fridge.

- DO NOT install the filter or any water tubing in high temperature areas eg in a ceiling cavity.

- AVOID contamination of pipes during installation.

- DO NOT use copper tubing. The plastic tubing supplied should always be used.

- DO NOT continuously dispense water for longer than 2 minutes.

- Never freeze carbonated drinks or liquids in glass containers. Liquid expands during freezing, which may cause the container to explode.

- Do not consume food if it is too cold. Food removed from the freezer compartment may be cold enough to cause damage when brought into contact with bare skin, eg frozen ice cubes.

Cleaning

- The exterior and interior of your refrigerator should be regularly cleaned. Only clean it with a solution of liquid dishwashing detergent dissolved in warm water. Do not use any other cleaning products as they can contain solvents which cause plastic components of your refrigerator to crack.

Ice & water models only

- DO NOT use water that is microbiologically unsafe or of unknown quality without adequate disinfection before or after the system.

- WARNING – connect to potable water supply only.

- DO NOT install on line pressure above 827 kPa (119 psi) or below 150 kPa (22 psi).

- DO NOT use on hot water supply (38°C [100°F max.]).

- DO NOT cut any length of tube shorter than 200 mm (8”).

- DO NOT install near electrical wires or water pipes that will be in the path of drilling when selecting the location of filter system.

- DO NOT mount filter in such a position so that it will be struck by other items, such as wastebaskets, etc.

- DO NOT install the filter or any water tubing in direct sunlight as prolonged exposure to light can weaken plastic components.

- DO NOT mount filter in such a position so that it will be struck by other items, such as wastebaskets, etc.

- DO NOT use copper tubing. The plastic tubing supplied should always be used.

- DO NOT continuously dispense water for longer than 2 minutes.

- Never store volatile or flammable materials in your refrigerator as they may explode.

- Do not consume food if it is too cold. Food removed from the freezer compartment may be cold enough to cause damage when brought into contact with bare skin, eg frozen ice cubes.

Cleaning

- The exterior and interior of your refrigerator should be regularly cleaned. Only clean it with a solution of liquid dishwashing detergent dissolved in warm water. Do not use any other cleaning products as they can contain solvents which cause plastic components of your refrigerator to crack.

Connect the white 6 mm tubing to the outlet of the water filter cartridge as shown in Fig. 1. Point 1. Gently push to ensure it is locked.

2c Special functions

Fast Freeze (Designer and Ice & Water models only)

Fast Freeze boosts the freezing speed by dropping the freezer to its coldest temperature for 12 hours, which helps to ensure vital freshness, texture and taste are retained during the freezing process.

To activate, press the button on the internal control panel. The FAST FREEZE light will be illuminated when the function is activated.

Bottle Chill (Designer and Ice & Water models only)

This function allows you to chill your beverages more rapidly in the freezer without the worry of forgetting about them. The timer is set for 15 minutes however the time taken to chill depends on the size of your beverage. If after 15 minutes your beverage is not cold enough, simply place it back in the freezer and reset the BOTTLE CHILL function.

To activate, press the button on the internal control panel. The BOTTLE CHILL light will be illuminated when the function is activated. The \( \text{ } \) icon will be illuminated on the external display (Ice & Water models only).

An alarm will sound after the 15 minute time has elapsed.

For non Ice & Water models: open the fresh food compartment door and press the button on the internal control panel to silence the alarm.

For Ice & Water models: the \( \text{ } \) icon will flash on the external display.

Press the button on the external display to silence the alarm.

Remember to remove your beverage from the freezer.

2d Ice maker

Ice maker first use

When you first turn your refrigerator on after installation, the ice maker will be off. The light above the ICE ON/OFF icon will be off.

To turn your ice maker on press the button. The light above the ICE ON/OFF icon will be illuminated when the ice maker is on.

Press and hold \( \text{ } \), \( \text{ } \), \( \text{ } \), \( \text{ } \), \( \text{ } \), \( \text{ } \), \( \text{ } \), \( \text{ } \), \( \text{ } \) together for 4 seconds then close the door(s). The ice tray will flip. Force another flip. The ice tray will flip and spill the water into the ice bin. Empty water and replace bin.

If the bin is full of ice, or inserted incorrectly, the ice maker will not operate. If all bins are removed the ice maker will not operate.

Disconnected ice cubes made in the first 24 hours of operation.

We recommend that you turn the ice maker off if:

- The water tank is full.
- The ice storage bin is to be removed for a period of time.
- You are going on holiday/vacation.

3a External display

There is one button with LED indicator and two LED icons along the top of the display.

Dispenser lock button and light

Locks/unlocks the water dispenser. Light is on when the water dispenser is locked.

Bottle Chill indicator

Indicates when BOTTLE CHILL is on and flashes when beverage is ready.

Filter change indicator

Indicates when the water filter requires changing.

3b Water dispenser

Water dispenser first use

- After installation, allow approximately one minute delay while the dispensing pad is pushed until water is dispensed. This will allow the tank to fill completely.
- After you fill the tank, dispense and discard 3 L to flush the tank out.
- Please note that once installation is complete a few drips may appear out of the dispenser over the next few days as the remaining trapped air is cleared.

FURTHER INFORMATION

Before you call for service or assistance...

Check the things you can do yourself. Refer to the installation instructions, your User Guide – in particular the troubleshooting section and check that:

1. Your product is correctly installed.
2. You are familiar with its normal operation.
3. If after checking these points you still need assistance or parts, refer to www.fisherpaykel.eu for regional service providers.

4. USING THE EXTERNAL DISPLAY & DISPENSER

Ice & Water models are fitted with an external display and water dispenser.

Fig. 7 External display and dispenser for Ice & Water models

5. USING THE INTERNAL CONTROL PANEL

All models are fitted with an internal display which consists of several LED indicators and several capacitive touch buttons. Three versions of the internal display are shown below.

Internal control panel

Fig. 3 Internal control panel for Designer and Elegance models

2b Alarm Mute

This function silences the door alarm for 20 minutes for times when you require the door to be open for longer than normal eg when cleaning.

To activate, press the button on the internal control panel. The Alarm Mute light will be illuminated when the function is activated.

2a Temperature adjustment

When the refrigerator is first turned on, the powerful cooling system will automatically cool both refrigerator and freezer compartments to their set temperatures. This will take between 2 – 3 hours.

To adjust compartment temperatures:

1. The FC compartment LED will automatically be illuminated. The temperature will show as a series of LEDs.
2. Use the \( \text{ } \) or \( \text{ } \) to adjust the FC temperature.
3. To adjust the FC compartment temperature press the button once so the FC compartment LED is illuminated.
4. Use the \( \text{ } \) or \( \text{ } \) to adjust the FC temperature.

1f Levelling of refrigerator doors (French door models only)

- For uneven surfaces, front feet can be used to align the 2 doors.
- If left hand door is too low, then unscrew the left hand foot to lift up the cabinet until the two doors top edges are aligned. If right hand door is too low, then adjust the right hand foot in the same way.

1g Before placing food in the fresh food or freezer compartments

- Remove all packaging from the refrigerator, clean the inside of the appliance, then run the refrigerator empty for 2 – 3 hours before placing food inside.

1e Stability

- It is important that all four corners of the refrigerator base are supported firmly on the floor to eliminate any cabinet movement.
- Installing the appliance on a soft or uneven or unlevel floor may result in vibration of the cabinet and poor sealing of the doors.
- Before moving your refrigerator into its position, ensure that the adjustable front feet are fully retracted by turning them anticlockwise.
- Position your refrigerator..Raise the front of the appliance until it is stable and the doors move towards the closed position, on their own, when open.
- The front levelling foot on the hinge side should take the majority of the weight of the cabinet and the cabinet should be stable, ie cabinet should not rock or wobble.
